Date?

This is a summary of a video titled "The 15 most advanced Technologies coming in 2024" that walks us through actually 10 upcoming Technologies that will have an immense impact on how we live the following years. First of all, we are greeted with "Extented Reality" which is reacting with a reality and Simulations that don't really exist thus doing stuff that would have never been possible. Up next, we are introduced in "Internet of Things". a tool that is used to connect every possible object via the internet, creating a network that improves everyones sourounding and how they work with them. Additionally, we learn about 5g, how it will create a Tech Revolution through it's use, improving augmented Reality, health care and traffic managment. Furthermore, Artificial Intelligence and mainly Cortana, a virtuall assistand by Microsoft that could benefit humans on organising their day to day lifes with tools like machine learning and syncing with Alexa. The video talks about 3D printing and how it could revolutionize Medical care with the creation of human and animal organs. Edge Computing is a more advanced version of Cloud Computing, that could handle data much much Faster and improving the ability of networs and their connectivity. We are also shown Quantum Computing, that advances our knowledge and how we process information and data managment, quantum computers are up 3x times stronger tha our average Computers. Following that is Cyber Security, a theme that evolves and improves every year, protecting from more advanced cyber thraids. Digital tweens. is a nee subject tha involves creating a virtual version

of every thing, that will benefit us on simulati
and how things around work. Last but not least, is
the Metaverse, an imense virtual world that anything
is possible, improving comunication and bussiness
colaboration.

Conclusion?

- Your writing work need to be better at some points
- Has a lot of potential to be an excellent paper.

## The 15 most advanced Technologies coming 2024

1) Extented Reality: popular among games
   : engage with reality that doesn't exist

2) Internet of things: Everything connects together through the internet
   : Improved Safety
   : Speeding up medical care

3) 5g: a game changer: Augmented & Virtual Reality
   : Traffic managment
   : Tech Revolution

4) ~~Cortana~~ Artificial Inteligence: Cortana by microsoft
   : machine learning
   : Cortana - Alexa syncing
   : AI assistand

5) 3D Printing: making real objects
   : making organs for med care

6) Edge Computing: Cloud Computing > Edge Comp
   : improve limited connectivity
   : handling data and making it faster

7) Quantum Computing: Could help med, how we process information, Managing data

8) Cyber Security:

9) Digital Tweens: Create clones of everything
: Virtual version of everything
: Discover how things work

10) The Metaverse: An imerse world that could help every aspect of life, communication, bussiness colaboration
