MOTIVATION

Business partners, including customers, suppliers and contacts, are central to ERP systems because they are involved in many processes. The purpose is to create data once that can be used repeatedly.

The business partner app is particularly challenging for beginners due to its complexity

This case study explains step by step how to create a business partner (customer) and explains the special features. In this way, you will learn how to deal with the complexity of this app and master it.

PREREQUISITES

Before you use this case study, you should be familiar with navigation in the SAP system.

NOTES

This case study uses the model company Global Bike.

Process Overview

Learning Objective Understand the business partner concept and create a business partner.

Time 120 min

Scenario For this case study, create a master record. Business partners are assigned specific roles. The following section will introduce you to the two SAP standard roles.

- **FLCU00 | FI Customer**: The data for financial accounting is stored in this role.
- **FLCU01 | Customer**: The sales data is maintained in this role.

Customer master records can be created centrally, which means that all views are created in one step. Alternatively, the responsibility can be distributed so that different employees in the finance and sales departments are responsible for creating and maintaining the data in their respective views.

Employees involved David Lopez (Sales Representative US East)

Table of Contents

Process Overview 2
Step 1: Create New Customer 4
Step 2: Maintain Business Partner (Debtor – FI View) 8
Step 3: Maintain Business Partner (Customer – Logistics View) 10
Step 4: Create Contact Person for Customer 14
Step 5: Create BP Relationship 17

Step 1: Create New Customer

Task Create a new customer. **Time** 15 min

Short Description Use the SAP Fiori Launchpad to create a new customer.

Name (Position) David Lopez (Sales Representative US East)

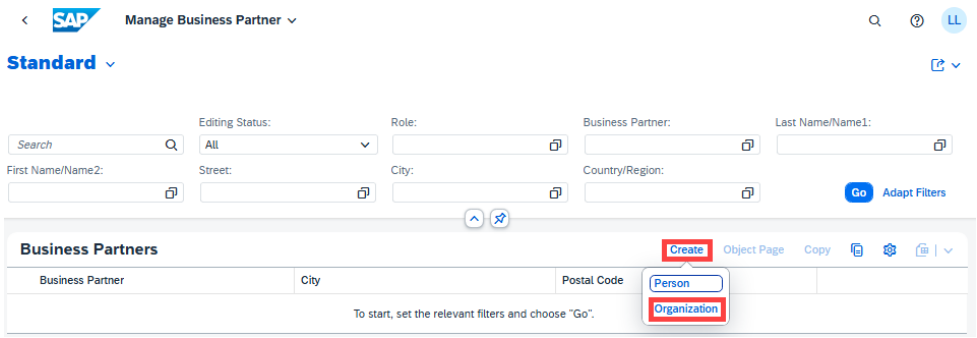

In the space *Sales and Distribution* in the role of *Sales Representative* use the app *Manage Business Partner Master Data* to create a new customer.

Start

On the *Manage Business Partner* screen, select the button Create. A submenu will open. Click **Organization** here.

Organization

Note Business partners are created at a higher level, i.e. across departments. They can be categorized either as a person or as an organization.

Person

A person represents a single natural person who is involved in business activities.

Organization

An organization can represent different entities:

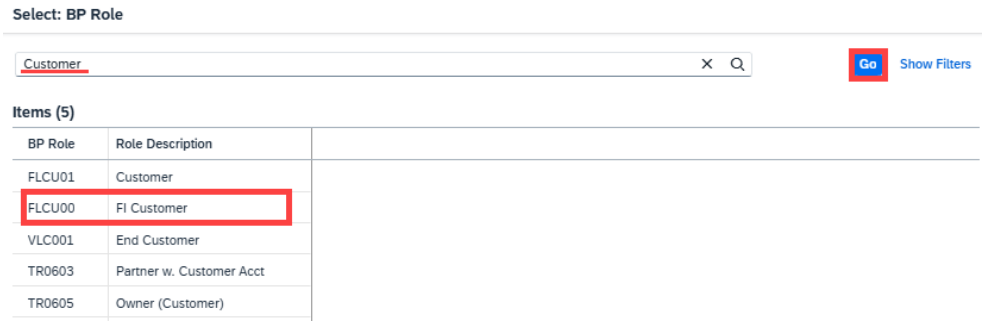

- Company (e.g. a legal entity)
- Departments or similar (parts of a legal entity)
- Association.

The term “organization” serves as a generic term to represent any situation that may arise in day-to-day business activities.

On the *Create Organization* screen, in the field *BP Role* click the input help icon . In the pop-up that opens, search for **Customer** and then select the entry **FLCU00 | FI Customer**.

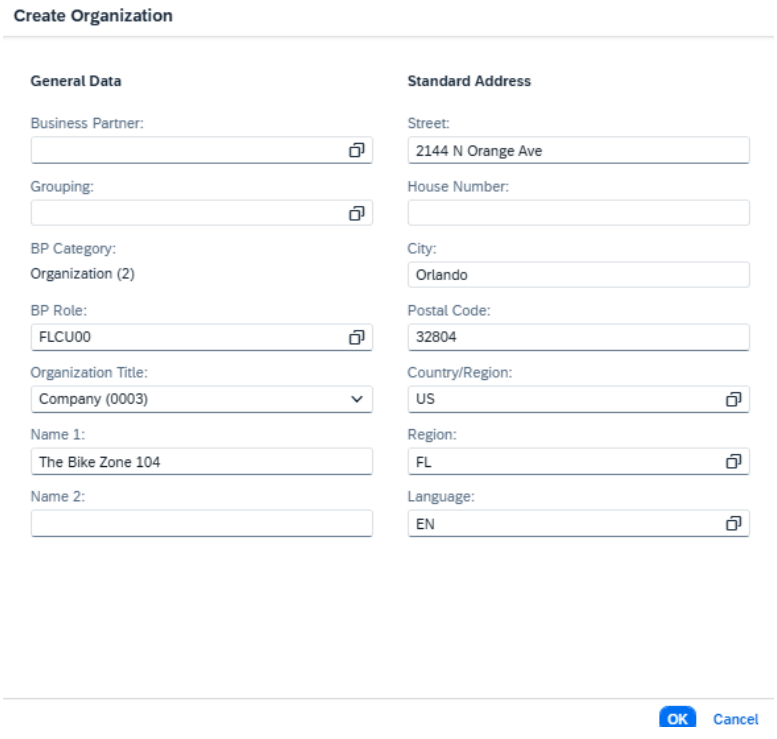

Customer

FLCU00 | FI Customer

Back on the *Create Organization* screen, please add the following information. As *Organization Title* choose **Company**, and as *Name 1* enter **The Bike Zone ###**. Remember to replace your three-digit number for ###, e.g. if your number is 003, please enter 003. Further, as *Street* enter **2144 N Orange Ave**, and as *City* enter **Orlando** (with the *Postal Code* **32804)**. In the field *Country*, please enter **US**, and choose **FL** as *Region*. Finally, for *Language* select **English**. Confirm your entries with OK.

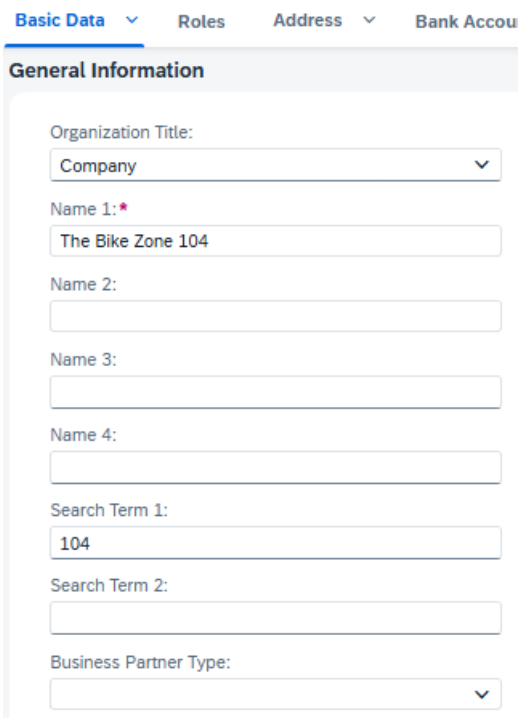

Company
The Bike Zone ###
2144 N Orange Ave
Orlando
32804
US
FL
EN

A new overview is generated. Make sure that you have selected the *Basic Data* tab. In the *General Information* area, in the field *Search Term 1* add your three-digit number ###.

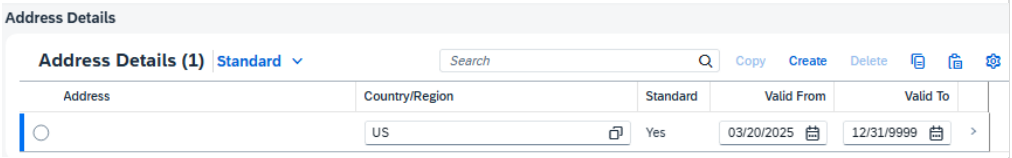

Basic Data

###

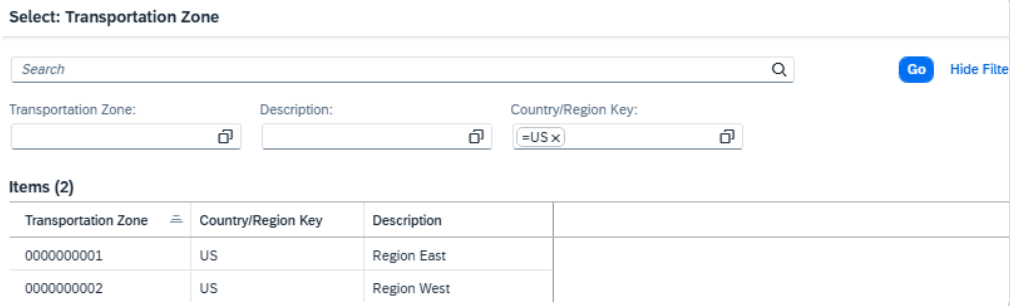

Select the *Address* → *Address Details* tab. You will see one line with the country details as well as the validity dates. Click › to maintain more details.

Address
Address Details

In the *Address* area, you can use the button Show More to display all the fields. Please find the *Transportation Zone* field and click the input help icon ⧉. The following pop-up window will open.

Transportation Zone

Click on **Region East** to select it. Finally, use the button Apply again to save your draft.

Region East

To finally save the business partner, press the buitton Create.

The SAP system creates the master data record for the new BP and assigns a unique business partner number. Make a note of the BP number, which you will find in the header.

Business Partner Number (Customer)

.....

Click on to return to the SAP Fiori Launchpad.

Step 2: Maintain Business Partner (Debtor – FI View)

Task Maintain additional information for the business partner in the customer role.

Time 10 min

Short Description Use the SAP Fiori Launchpad to maintain the business partner.

Name (Position) David Lopez (Sales Representative US East)

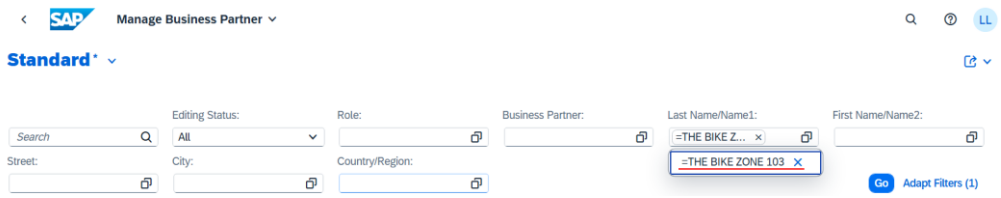

In the space *Sales and Distribution* in the role of *Sales Representative* use the app *Manage Business Partner Master Data* to maintain the business partner.

Start

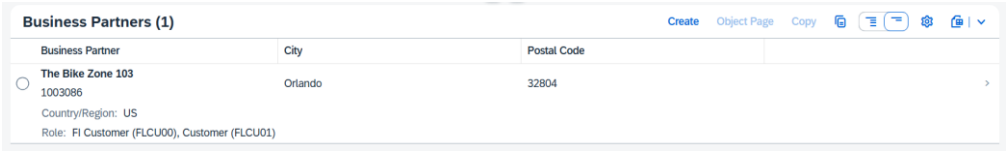

In the Manage business partners view, enter your newly created business partner **The Bike Zone ###** (from step 1) in the Surname/Name 1 field.

The Bike Zone ###

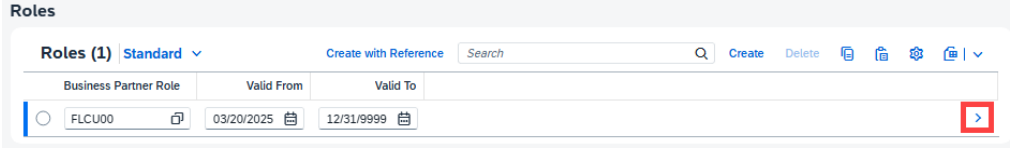

Then press Go. Your business partner should be displayed accordingly.

Click on your business partner to display the master data record. Then press Edit in the upper area. The editing mode opens.

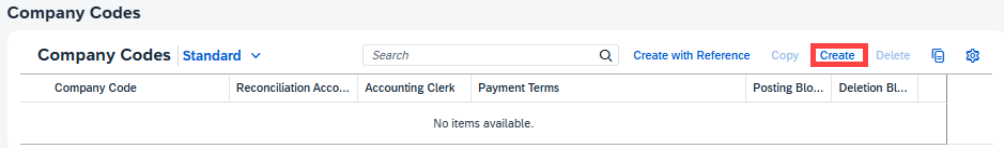

Then, select the *Roles* tab. Auto-scroll will take you to the correct position. You will see a line with the details of the business partner role as well as the validity dates. At the end of the line, click › to maintain further details.

Roles

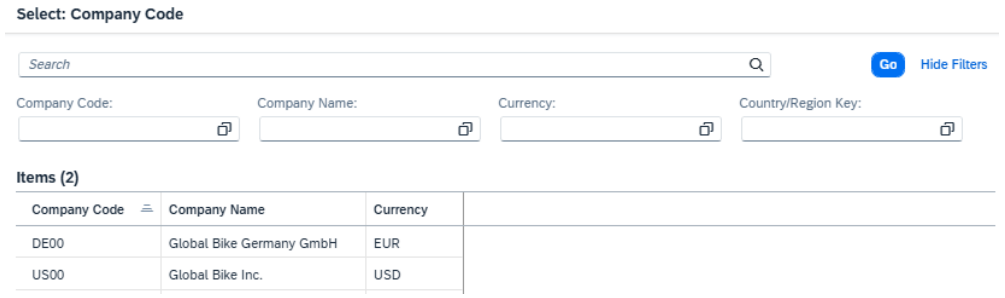

Company Codes

A new screen is loading. Select the *Company Codes* tab. Currently, there is no record maintained for the company codes, so please select Create.

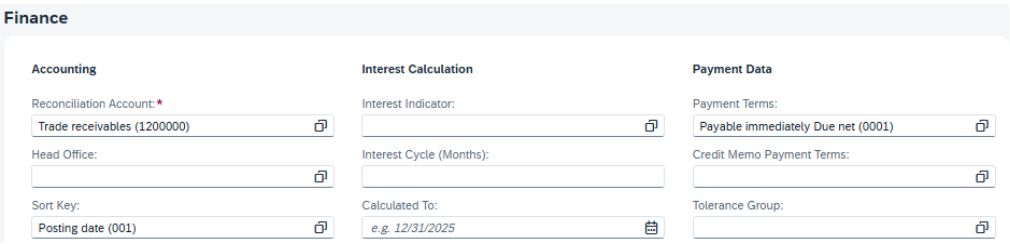

In the *Company Code* field, click the input help icon . The following pop-up window opens.

US00
1200000
001
0001

Click on **US00** (*Global Bike Inc.*). In the *Finance* area, as the *Reconciliation Account* enter **1200000** (*Trade Receivables*) and as the *Sort Key* choose **001** (*Posting Date*). In the field *Payment Term*, please add **0001** (*Payable immediately Due net*).

Select Apply to save the draft and return to the role level. Confirm your entries and return to the BP level by clicking Apply in the lower screen area You can then select Save.

Click on SAP to return to the SAP Fiori Launchpad.

Step 3: Maintain Business Partner (Customer – Logistics View)

Task Maintain additional information for the business partner in the customer role. Assign the corresponding sales areas to the business partner.

Time 10 min

Short Description Use the SAP Fiori Launchpad to maintain the business partner.

Name (Position) David Lopez (Sales Representative US East)

Note In order to enter sales area data for the business partner that you just created, you must first assign a business partner role to it. This role allows you to perform logistics processes, such as creating inquiries or quotations.

To customize a business partner, access the *Manage Business Partner Master Data* app in the *Sales and Distribution* area, while working as a *Sales Representative role*

Start

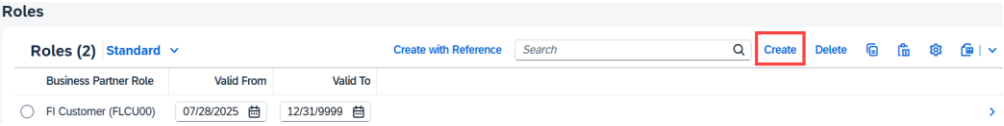

Search again for the business partner you just created, **The Bike Zone ###** (from step 1), and go back to edit mode.

The Bike Zone ###

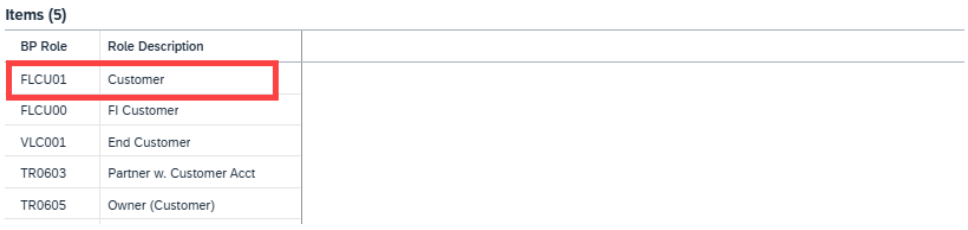

To be able to add sales area data for the customer you have just created, you have to assign a new business partner role. For this purpose, select the *Roles* tab. There, choose Create again to create a new row for another Business Partner Role (logistics view).

Roles

In the empty Business Partner Role field, click on the value help icon . In the pop-up, search for **Customer** and then select the entry **FLCU01 - Customer**.

Customer
FLCU01 | Customer

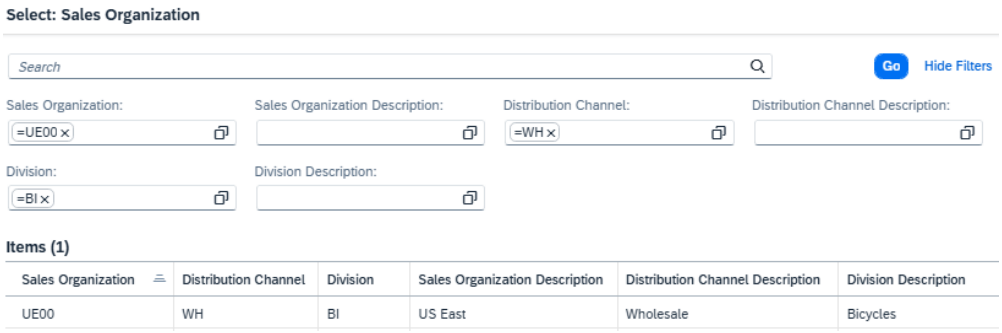

Sales Areas

At the end of the new line, you can click on › to maintain more details. Switch to the tab *Sales Areas* to maintain the sales area data of your customer. Since no data record currently exists, select the button Create accordingly.

UE00
WH
BI

In the field Sales Organization click on the value help symbol . In the pop-up window that opens, enter **UE00** as the *sales organization*, **WH** (*Wholesale*) as the distribution channel and **BI** (*Bicycles*) as the division. Then press Go.

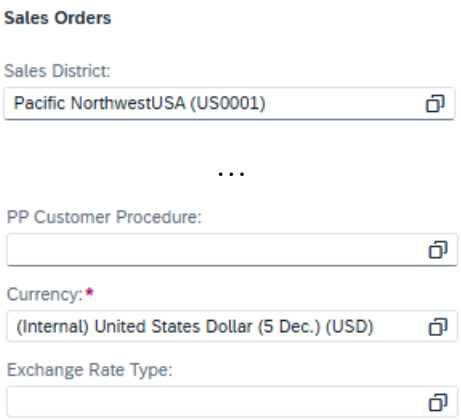

US East

Click on **US East** to accept the entry. The fields will be filled accordingly in the General Data.

Sales Area Details
US0001
USD

Then select the *Sales Area Details* tab. In the *Sales Orders* section, enter **US0001** as the *Sales District* and ensure that **USD** is entered as the *currency*.

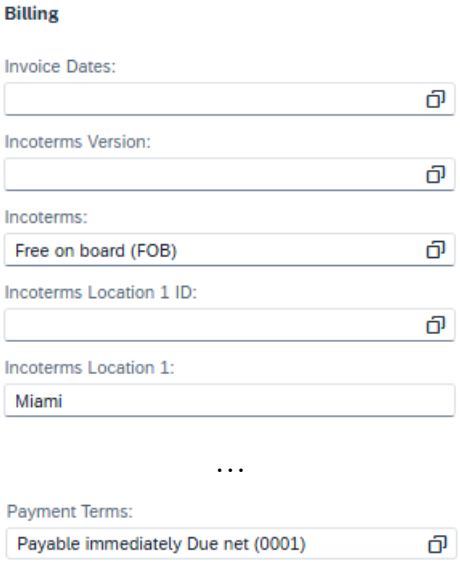

FOB
Miami
0001

In the *Billing* section, enter **FOB** (*Free on Board*) as the *Incoterms* and **Miami** as the *Incoterms Location 1*. Also add **0001** (*Payable immediately Due net*) as *Payment Terms*.

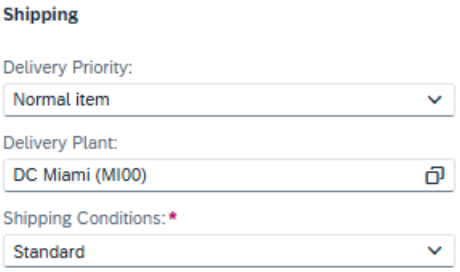

Incoterms

Incoterms (abbreviation for **In**ternational **Co**mmercial **Terms**) are internationally recognized terms of delivery published by the International Chamber of Commerce (ICC) for international trade law.

In the *Shipping area*, select **Normal item** from the drop-down list as the *Delivery Priority* and **Standard** as the *Shipping Conditions*. Add **MI00** (Miami) as the delivery plant.

Normal items
Standard
MI00

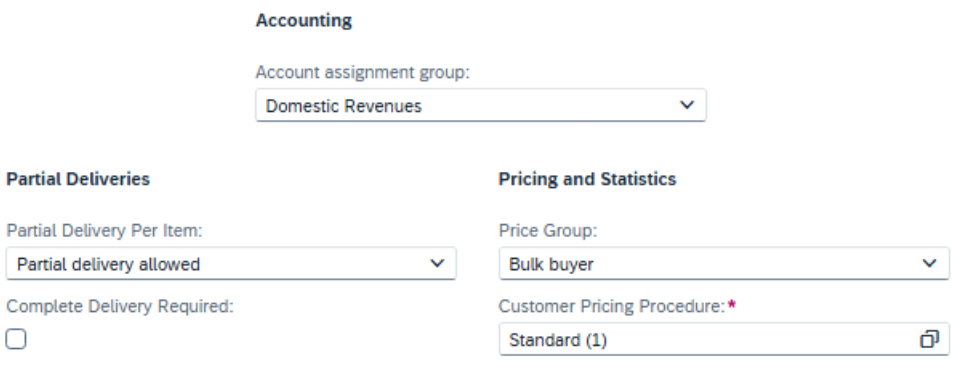

In the *Accounting* area, select **Domestic Revenues** as the *account assignment group* from the drop-down list. In the following area *Partial Deliveries* use the dropdown list in the field *Partial delivery per item* and thus select **Partial delivery allowed**. In the last area of this input screen, *Price Group*, use the drop-down list to select **Bulk Buyer** as the *Price Group* and enter **1** (*standard*) as the *Customer Pricing Procedure*. Compare your entries with the following screenshots and confirm your entries with Enter.

Domestic Revenue

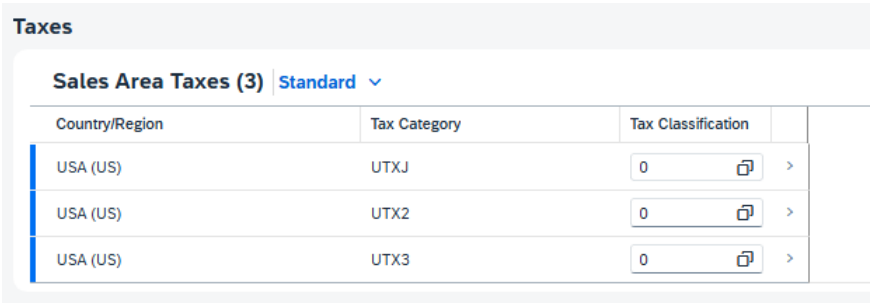

Partial delivery allowed

Bulk Buyer
1

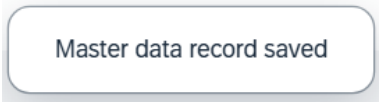

Then select the *Taxes* tab. Enter the tax classification **0** (no tax) for all three tax categories.

Taxes
0

Select the button Apply to save your adjustments as a draft. Then press Apply to finish editing the client role. To finally save the business partner, press the buitton Create.

Click on SAP to return to the SAP Fiori Launchpad.

Step 4: Create Contact Person for Customer

Task Create a contact person for the customer **Time** 10 min

Short Description Use the SAP Fiori Launchpad to create a contact person.

Name (Position) David Lopez (Sales Representative US East)

Scenario

Now that you have created the master data for your new customer, The Bike Zone, you can create the master data for a contact person. This contact person is a Bike Zone employee that Global Bike uses to communicate with The Bike Zone.

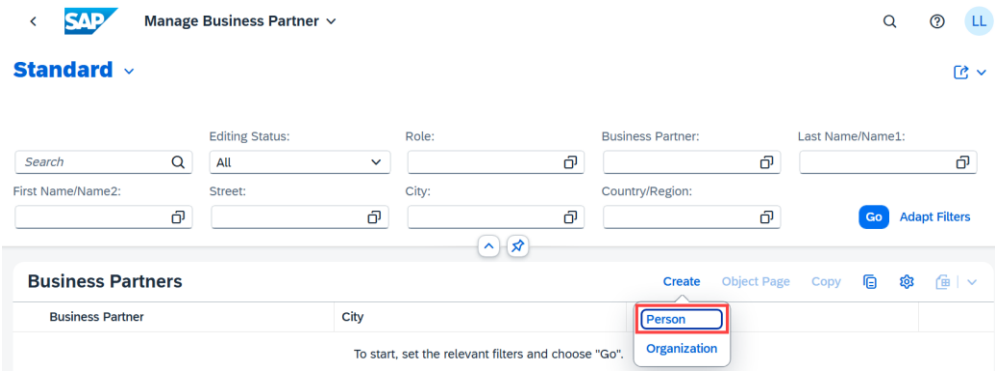

Start

To create a contact person, access the *Manage Business Partner Master Data* app in the *Sales and Distribution* area, while working as a *Sales Representative role.*

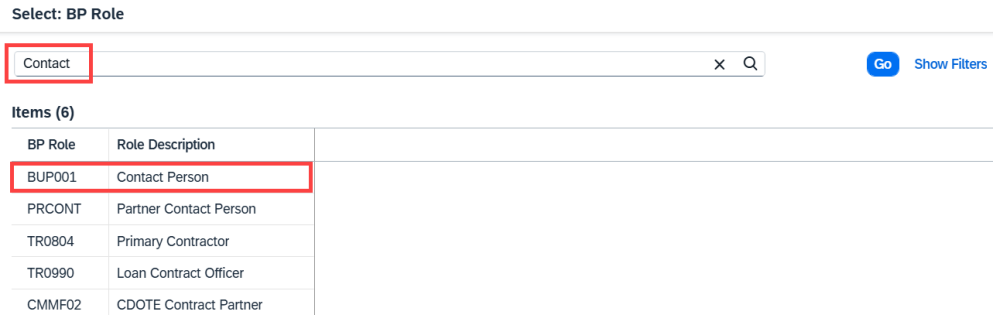

Person

In the Manage business partners view, select the item Create. A submenu opens. Click on *Person* here.

Contact
BUP001 | Contact person

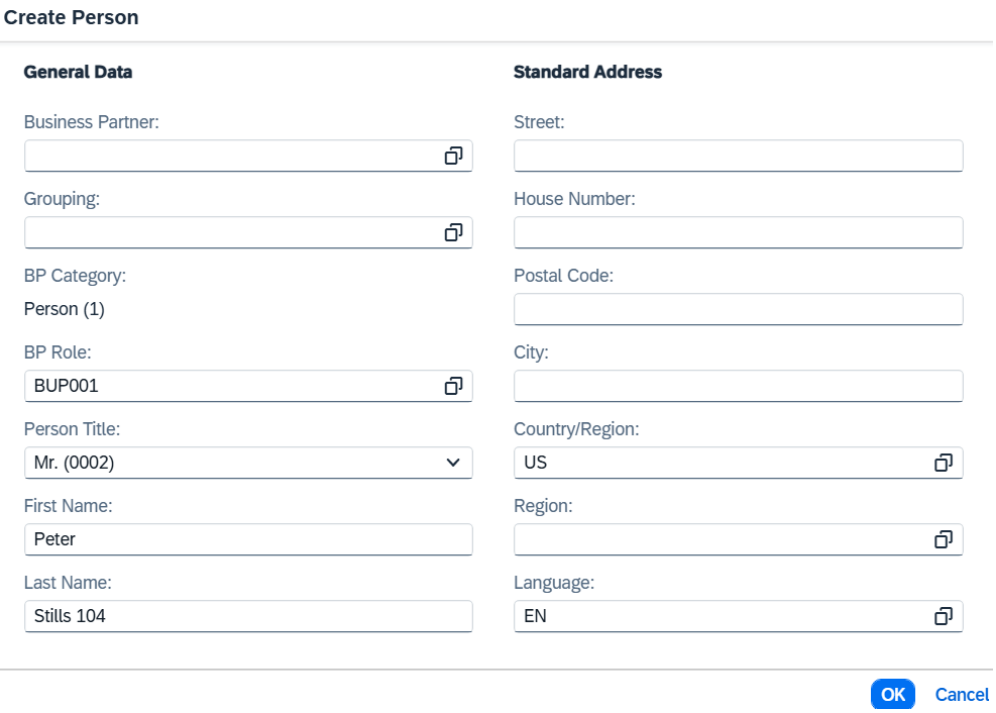

In the *Create person* pop-up window, click on the value help icon in the *BP role* field. In the pop-up, search for **Contact** and then select the entry **BUP001 | Contact person**.

Enter the person's **title, first name** and **surname** of your choice. Add your number (###) to the fictitious surname. This will make it easier for you to identify your entry later if people with the same name have been created. Please enter **US** as the country and **EN** as the language. Confirm your entries with OK.

Title,first name, surename

US, EN

A new overview has been generated. In the General Information area, enter your three-digit number ### in the *Search Term 1 field.*

###

Click on Create to save your business partner. The SAP system creates the master data record for the new contact person and assigns them a unique business partner number (header area). Please make a note of this number.

Business partner (contact person)

Click on SAP to return to the SAP Fiori Launchpad.

Step 5: Create BP Relationship

Task Create a relationship between the two business partners. **Time** 5 min

Short Description Use the SAP Fiori Launchpad to maintain the business partner relationship.

Name (Position) David Lopez (Sales Representative US East)

Scenario

The contact person from The Bike Zone must be entered as a business partner in the GP master data.

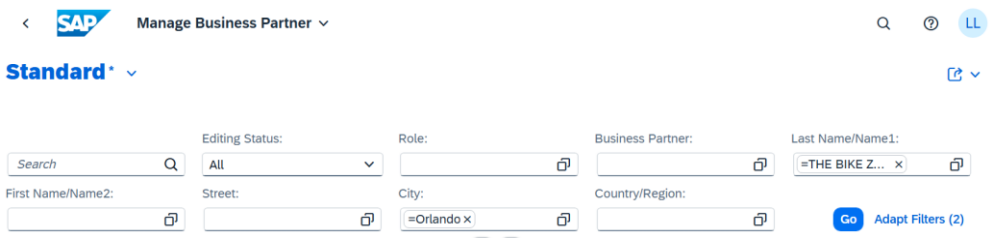

Start

To customize a business partner, access the *Manage Business Partner Master Data* app in the *Sales and Distribution* area as in the sales person role.

Business partner number (customer) (Orlando)

In the Manage business partners view, enter your **business partner number** (from Step 1) in the Business partner field. Alternatively, you can also enter **Orlando** as the location.

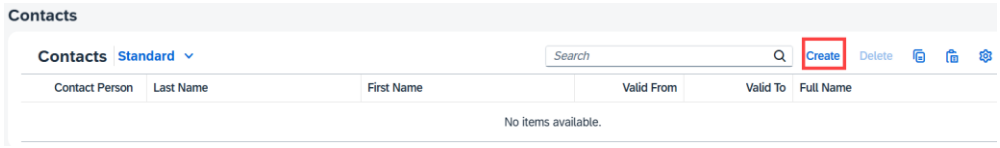

Then press Go. Your business partner should be displayed accordingly.

Click on your business partner to display the master data record. Then press Edit in the upper area. The editing mode opens.

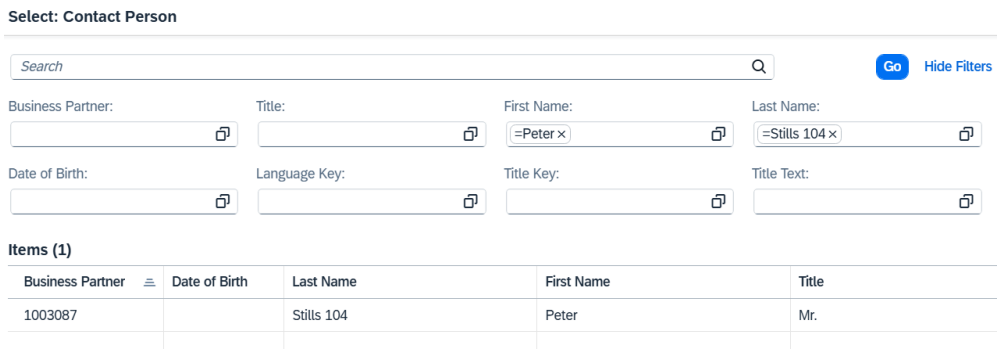

Contact person

Select the Contacts tab. Click on Create to create a new row in the Contacts area.

Click on the Value Help icon in the Contact Person field. In the pop-up window that opens, enter your contact person's **business partner number** in the Business partner field. Alternatively, you can use the **first name and last name**. Add your number (###) to the surname. Then press Go.

Business partner number
First name, last name

Your business partner is displayed accordingly. Click on it to enter it as the contact person for your customer, The Bike Zone. Click Save to apply your changes.

Click on SAP to return to the SAP Fiori Launchpad.
