MOTIVATION

This case study represents an introduction to human resource related organizational management and personnel administration in a human resource management system on the basis of the HCM (Human Capital Management) module of an SAP S/4HANA system.

Hence, the case study is addressed to SAP HCM first-time users. As previous knowledge, basic principles of S/4HANA as well as navigation fundamentals in an SAP S/4HANA system are required.

In the scenario's context of the HCM case study, a new department in the GBI company is created. Three positions are defined within the new department, from which two are assigned to employees in the course of the case study.

PREREQUISITES

Before you use this case study, you should be familiar with navigation in the SAP system.

In order to successfully work through this case study, it is not necessary to have finished the HCM exercises. However, it is recommended.

NOTES

This case study uses the Global Bike (GBI) data set, which has been created exclusively for SAP UA global curricula.

Process Overview

Learning Objective Understanding and executing a hiring/leaving/transfer process in SAP HCM

Time 75 min.

Scenario At Global Bike Inc. in Dallas, a new security department is to be equipped with three positions initially. As an employee in Human Resources, you are responsible for entering the data of the new employees into the system and hiring a new employee via an application process. Through additional training and assessment, this employee can even potentially be promoted. As part of the double check, you ensure that all changes have also been transferred to organizational management.

Employees involved Sang Cha (Senior Personnel Administrator)

Chris Thomas (Personnel Administrator)

The process begins with the creation of three positions: for the head of department, a manager and an employee. You then fill the head of department position by carrying out a personnel action. The position of security guard is then also filled by means of a personnel action. In the next step, the head of department ends his work in the company and the security manager takes over the role of head of department. Finally, check the changes in the organizational structure to ensure that all positions have been correctly filled and updated.

Table of Contents

Process Overview 2
Step 1: Create Positions 4
Step 2: Hire Employee 1 9
Step 3: Hire Employee 2 14
Step 4: Display Organizational Plan 19
Step 5: Departure of an Employee 20
Step 6: Transfer of an Employee 23
Step 7: Display Organizational Plan 26

Step 1: Create Positions

Task Create positions within the organizational structure **Time** 15 min.

Short Description Use the SAP Fiori Launchpad to create three positions for the new security organizational unit.

Name (Position) Sang Cha (Senior Personnel Administrator)

Note Positions are filled by employees. If a position is not filled, it is vacant. Positions are assigned to organizational units.

Example: Position administrator of accounts payable accounting.

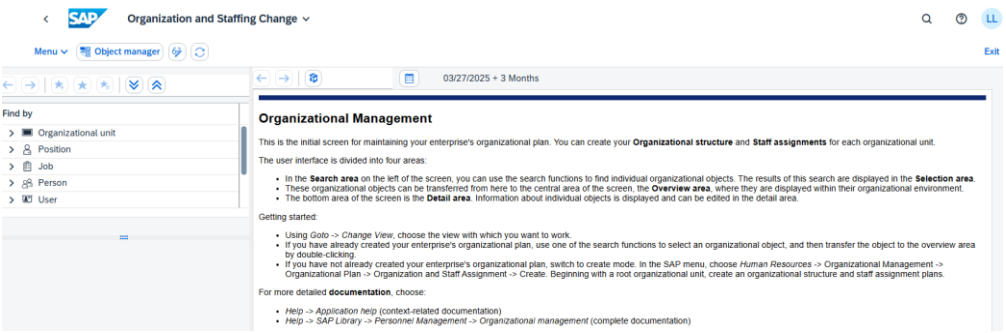

Positions

To create a position, use in the *Human Capital Management* area on the *Personnel Management* page in the *Senior Personnel Administrator* role the app *Organizational Management.*

Start

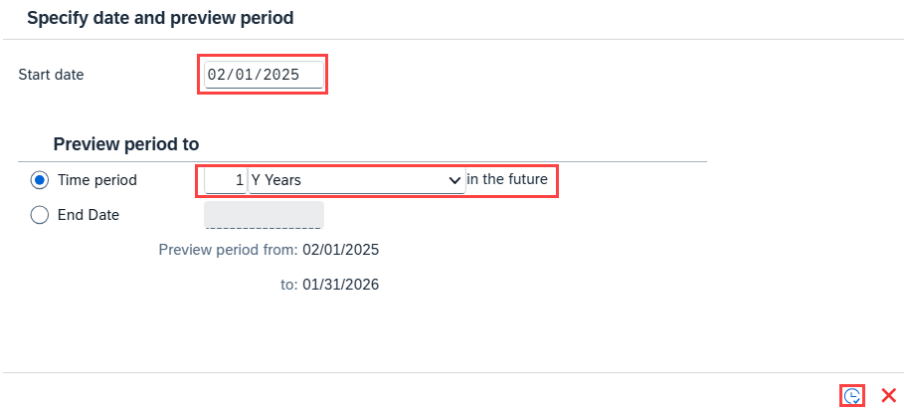

The *Organization and Staffing Change* screen appears.

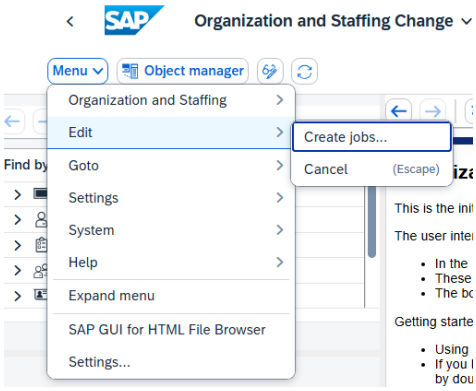

To create positions with backdated validity, first change the preview period. To do this, click on and enter the **1st of the last month** as the start date. Also select a preview period of **1 year** in the future and then click on .

1st last month
One year

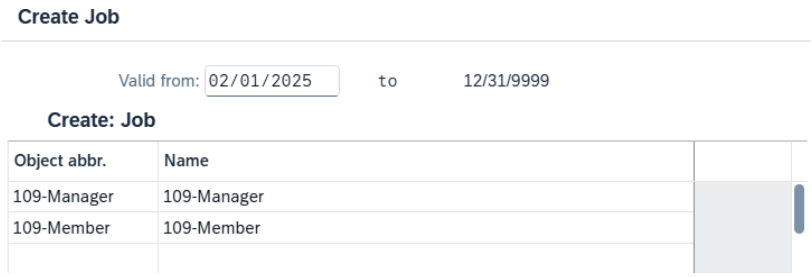

Create two jobs by navigating via the drop-down menu. On the left-hand side of the screen you will find the **Menu item → Edit → Create jobs.**

A Create job window opens, enter **###-Manager** and **###-Member** in the Object abbreviation field. Please define your own designations. Remember to enter your three-digit number for ###, e.g. if your number is 109, please enter 109.

###-Manager
###-Member

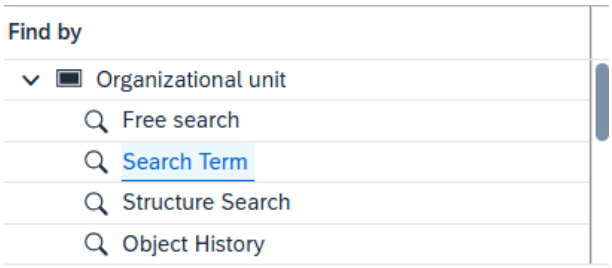

Then save the new jobs with ✓. You will receive a information that 2 objects have been created, confirm this with ✓.

Press Save to save your newly created jobs.

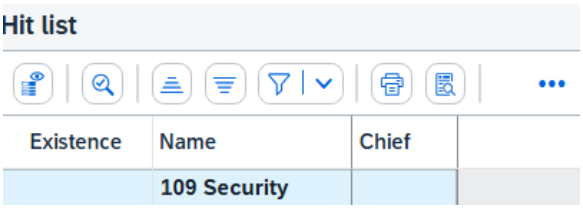

Note Jobs are general classifications of functions in a company (e.g. clerk). They define the task and characteristics of a position independently of a specific filling. A job serves as the basis for creating several positions with comparable requirements and forms the basis for job descriptions. The job must be saved so that the subsequent steps, such as the creation of positions, can be carried out.

The positions should be created in the Security department. To do this, go to the search area *Search for* **Organizational unit → Search Term.**

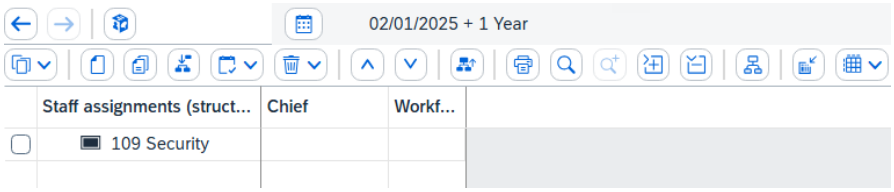

In the pop-up Search for organizational unit that opens, enter **### Security** (replace ### with your number) in the field *with name* and press Find . The search result is displayed in the hit list of the selection area on the left-hand side of the screen.

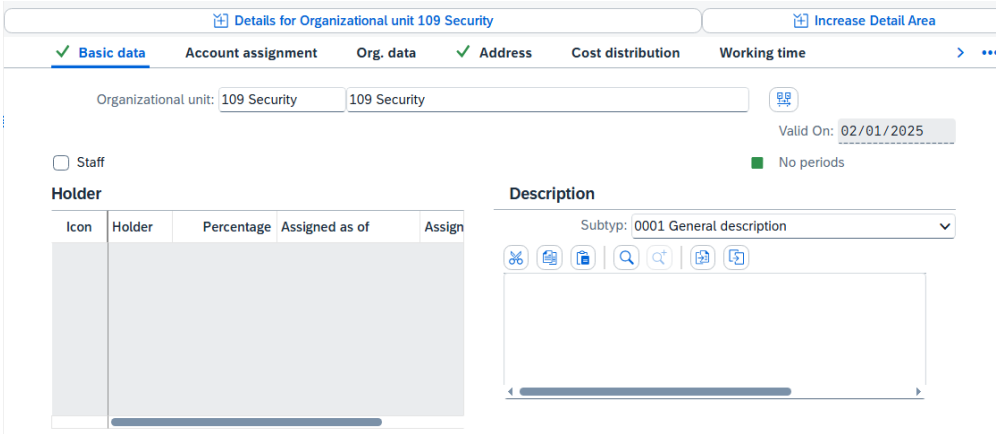

Security

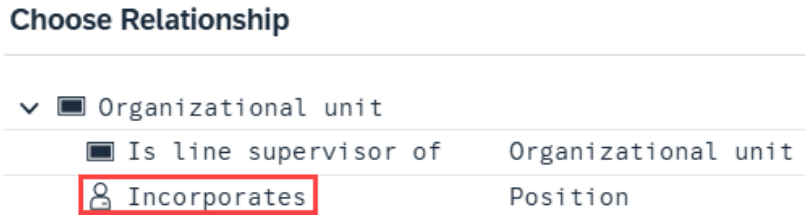

Select your organizational unit from the selection area by double-clicking on it so that it is displayed in the central overview area.

The basic data of your organizational unit *### Security* is displayed in the detail area.

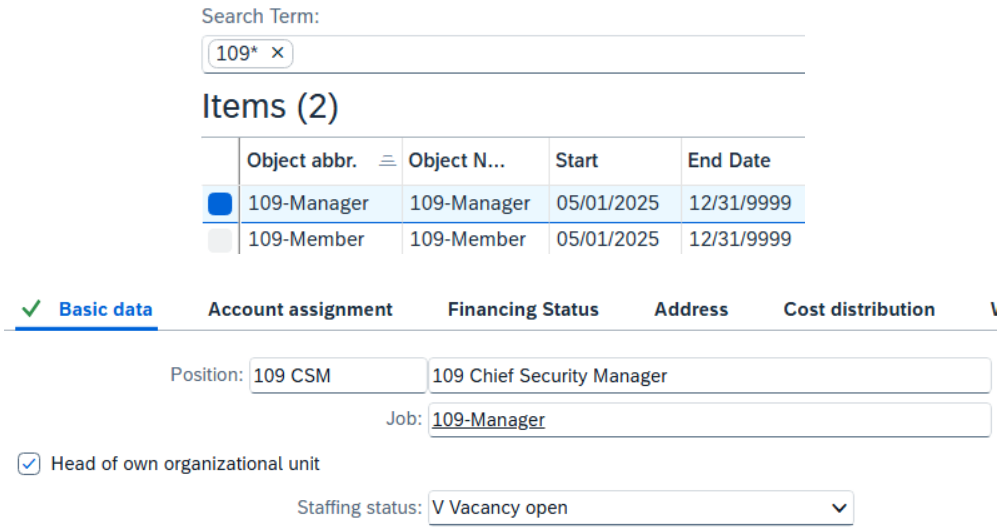

Select your organizational unit in the overview area and click on in the context menu to create a new link. In the *Choose Relationship* window that opens, click on Incorporates .

A new position is created under your organizational unit *### Security*. You will now see the information for the new position in the detail area. For the *position*, enter **### CSM** as the *abbreviation* in the field on the left and **### Chief Security Manager** as *the name* in the field on the right. Also activate the **Head of own organizational unit** checkbox. Delete the default value in the Job field, enter **###*** and start the value help. In the new window, press Go, select the job **###- Manager** and double-click.

CSM
Chief Security Manager
Head of own organizational unit

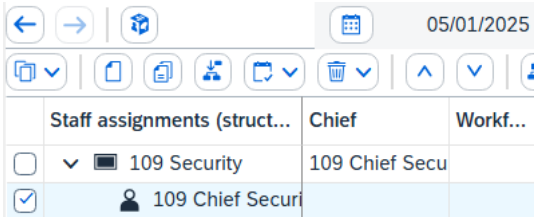

###-Manager

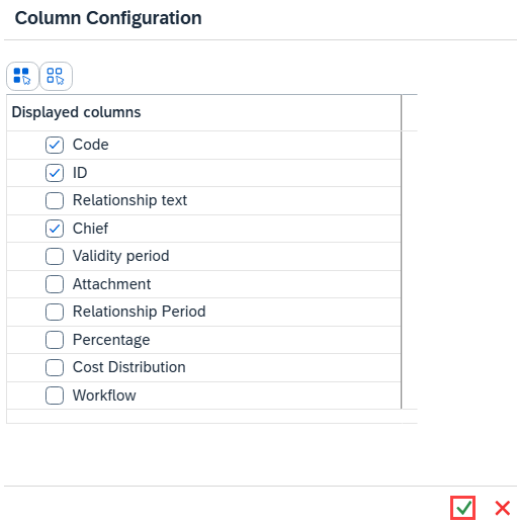

The **1st of the last month** is automatically entered in the *Valid from* field, provided you have adjusted the start date accordingly at the beginning.

1st of the last month

Press Save to save your new position. As you may have noticed, the overview area has already been updated during editing.

To show the *Code* and *ID* columns, press . In the Column configuration window, select *Code* and *ID*. You can deselect *Workflow* and then continue with ✓.

The selected columns are then displayed in the overview.

Staff assignments (structure)	Code	ID	Chief
109 Security	109 Security	O 50000311	109 Chief Security Manager
109 Chief Security Manager	109 CSM	S 50004356	

Repeat this procedure for two further positions (**Security Guard** and **Security Manager**) in the organizational unit *### Security*. Both positions are not managers, but are also valid from the **1st of the last month.**

###-Security Guard
Security Manager

Enter **### SG** as the *abbreviation* for the second position and **### Security Guard** as *the name*, select **###-Member** again for the position

SG
Security Guard
Member

For the third position, please enter **### SM** as the *abbreviation* and **### Security Manager** as *the name* and select **###-Member** again for the position

SM
Security Manager
Member

Staff assignments (structure)	Code	ID	Chief
109 Security	109 Security	O 50000311	109 Chief Security Manager
109 Chief Security Manager	109 CSM	S 50004356	
109 Security Guard	109 SG	S 50004357	
109 Security Manager	109 SM	S 50004358	

Press Save to save your data.

Click on SAP to return to the SAP Fiori Launchpad.

Step 2: Hire Employee 1

Task Hire an employee. **Time** 15 min.

Description Use the Fiori Launchpad to hire an employee in the new security department.

Name (Position) Sang Cha (Senior Personnel Administrator)

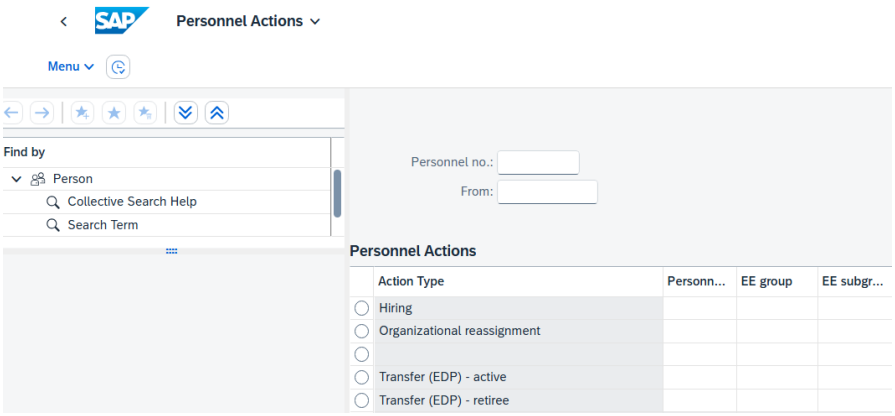

To hire the employee, use in the *Human Capital Management* area on the *Personnel Management* page in the *Senior Personnel Administrator* role the app *Hiring/transfer Employee.*

Start

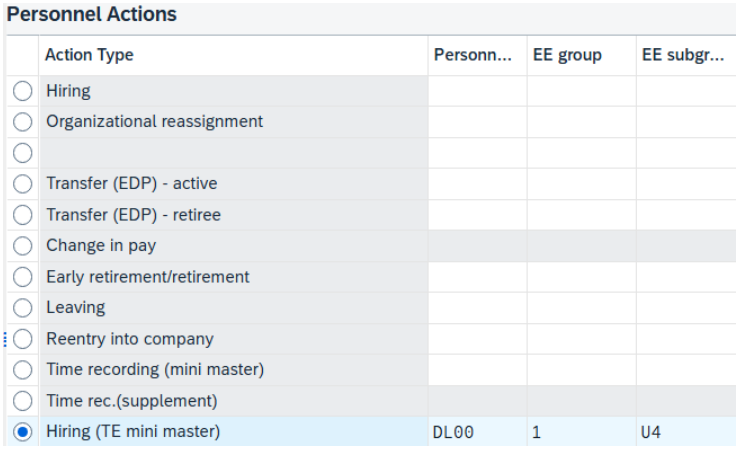

Make sure that the *Personnel number* field is empty and enter **1st of the last month** as the start of employment.

1st of last month

Then select the **Hiring (TE mini-master)** in the Action type list and fill in the 3 columns next to it, using the value help. *For personnel area* **DL00** (Global Bike Dallas), as *employee group* **1** (*Active*) and as *employee subgroup* **U4** (*Salaried employees*).

DL00
1
U4

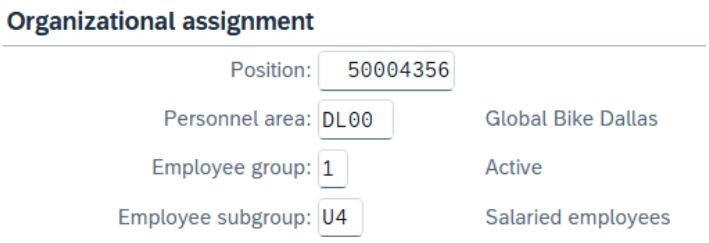

Then press to create the task, focus on the *Organizational assignment* area. Now click on the value help symbol in the *Position* field.

In the *Position (1)* window that opens, replace the search term with **###*** and then select the **### Chief Security Manager**. Remember to enter your three-digit number for ###, e.g. if your number is 009, please enter 009.

###*
Chief Securtiy Managager

Confirm the selection with OK.

Press Save to save the action. You are automatically directed to the *Create Personal data* screen. Make a note of the employee's personnel number, which you can find in the *Personnel number*. field at the top of the screen.

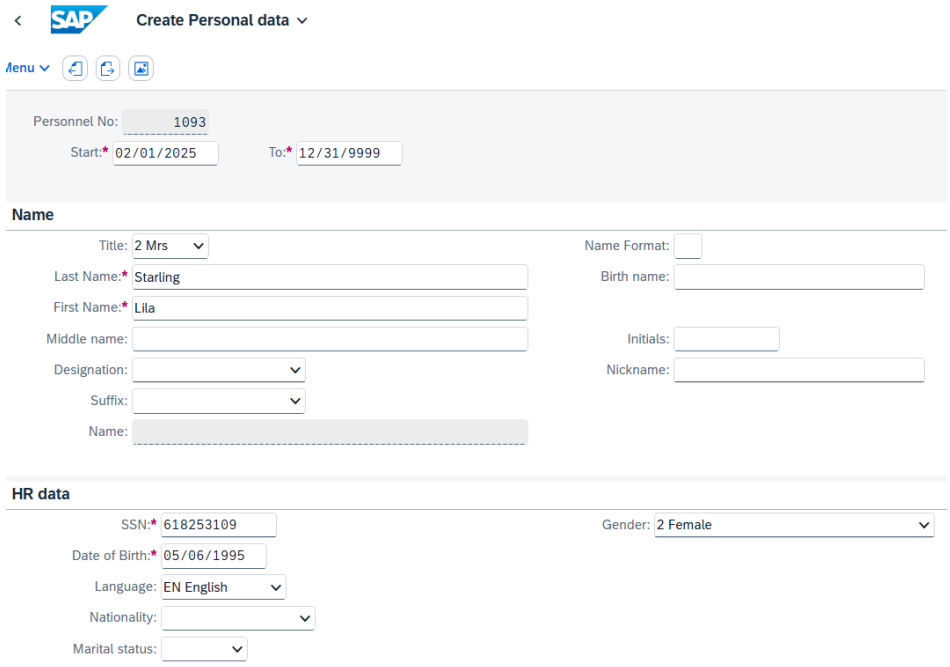

Personnel number:

_____

Note Personal information such as surname, first name and date of birth are defined in data fields. Data fields are grouped into information units according to their content. In Human Resources, these information units are referred to as information types or infotypes for short. Infotypes for employees are managed in Personnel Administration and are linked to the organizational plan via their position assignment**.**

Specify the title and enter a **last** and **first name** as well as a **date of birth** of your choice. For the **social security number (SSN)** enter **618253###** and select **English** as the *language*. Finally, you can select the appropriate **gender** if you wish.

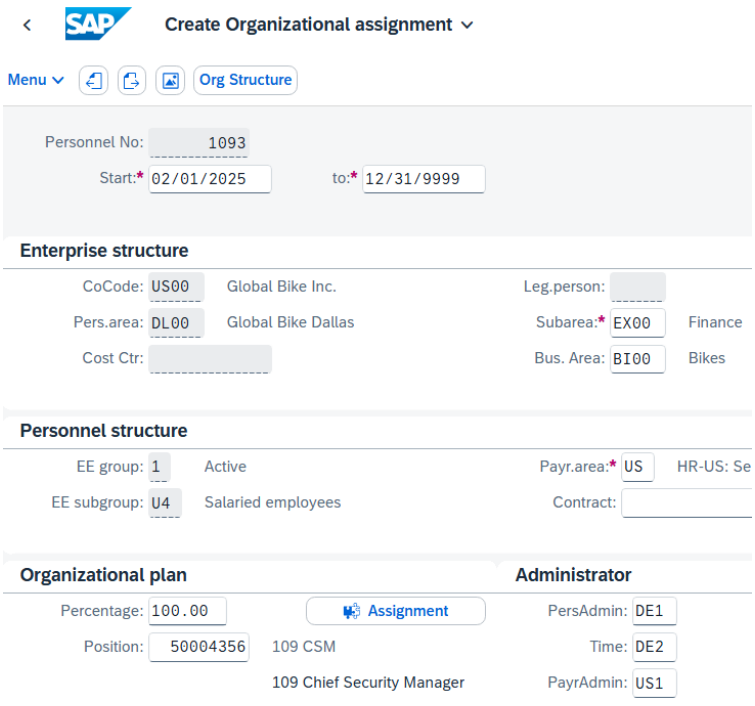

Title
Last Name
First Name
Date of Birth
SSN
gender

Press Save to confirm your data for this infotype.

You are automatically forwarded to the next infotype Create *Organizational assignment*. In the *Enterprise structure* area, enter **EX00** as the personnel sub-area (*Subarea*). In the *Administrator* area, use the input help to select Administrator **DE1** for *PerAdmin*, **DE2** for *Time* and **US1** for *PayrAdmin*.

EX00
DE1, DE2
US1

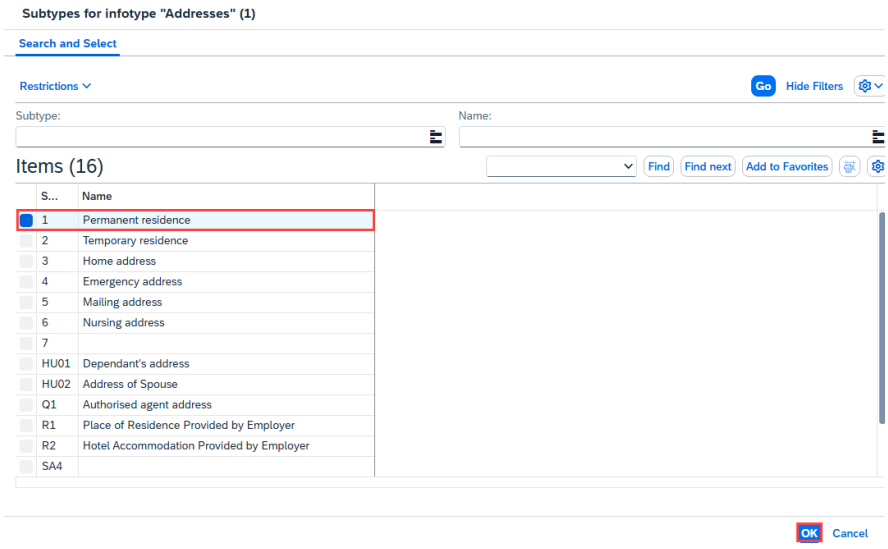

Note Different administrators can be found and assigned for different HR processes (e.g. different people are often responsible for payroll accounting and time management processes in larger companies).

Select again Save. The *Delimit vacancy* pop-up opens. Confirm the delimitation of the vacancy for your position by clicking on Yes.

For the following *Create travel privileges* infotype, click on Save, as you do not need to make any changes here.

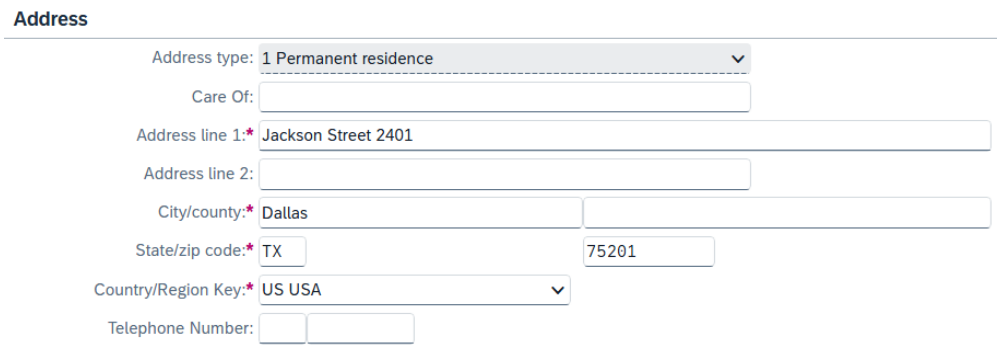

In the *Subtypes for infotype Addresses(1)* window that opens, select **Permanent residence** and continue with OK.

Permanent residence

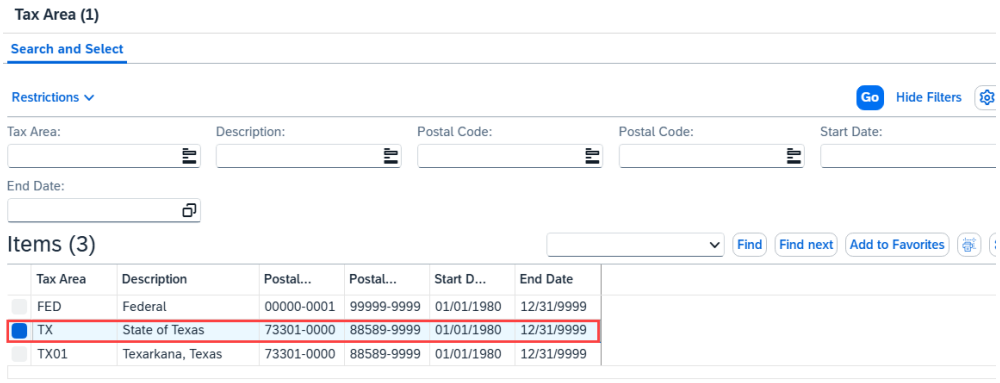

In the *Create Addresses* infotype, enter data of your choice for the **street** and **house number** in the *Address line 1* field. Enter **Dallas** as the *city*, **TX** (*Texas*) as *the state* and **75201** as the *zip code*. The country key is selected automatically.

Street
Dallas
TX
75201

Continue by pressing on Save. In the pop-up tax *territory*, select **TX** from the list. Then click on OK.

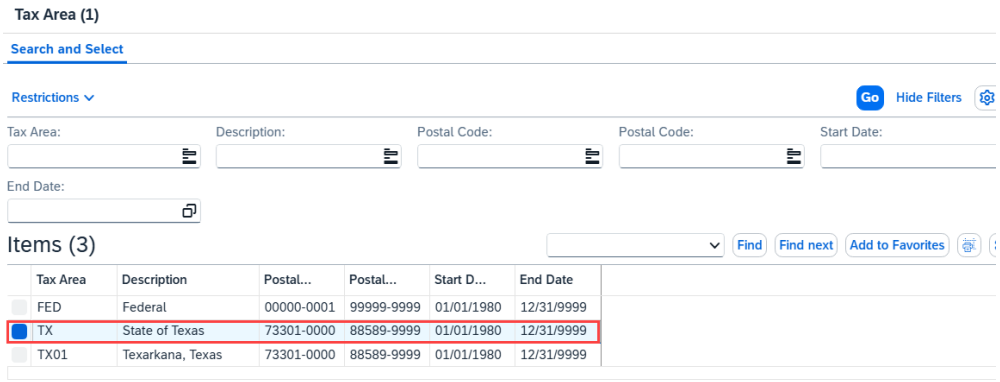

TX

Press Save for the *Create Residence Tax Area* infotype, as well as for the following two infotypes *Create Work Tax Area* and *Create Unemployment State*.

In the *Tax Area* pop-up that opens, select **TX** again. Accept the selection with OK.

TX

The *Create Residence Tax Area* infotype opens again, confirm all changes with Save. A warning message then appears that a data record will be deleted, confirm this with ✓. No data will be deleted, only overwritten.

Press Save to save the current infotype, again a message appears that a data record will be deleted, confirm with ✓.

Repeat the procedure until you reach the *Create Bank Details* infotype. Accept the entries without making any changes by clicking Save. The data record is now complete and you return to the *Personnel actions* screen.

Click on SAP to return to the SAP Fiori Launchpad.

Step 3: Hire Employee 2

Task Hire an employee. **Time** 15 Min.

Description Use the Fiori Launchpad to hire an employee in the new security department.

Name (Position) Sang Cha (Senior Personnel Administrator)

To hire the employee, use in the *Human Capital Management* area on the *Personnel Management* page in the *Senior Personnel Administrator* role the app *Hiring/transfer Employee.*

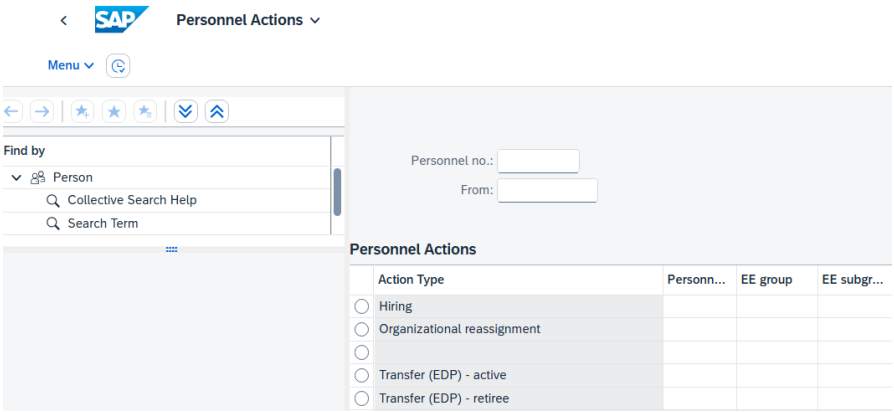

Start

Note Employees fill positions in the organizational structure, which is determined by organizational management. An example of a position is the purchasing clerk**.**

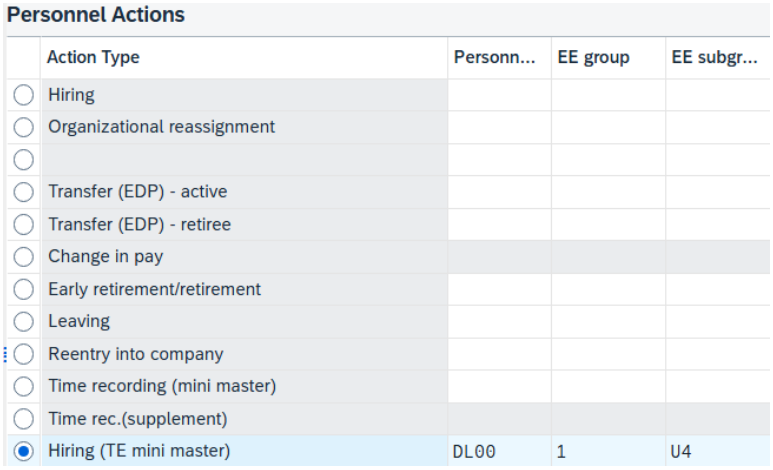

Make sure that the *Personnel number* field is empty and enter **1st of the last month** as the start of employment.

1st of last month

Then select the **Hiring (TE mini-master)** in the Action type list and fill in the 3 columns next to it, using the value help. *For personnel area* **DL00** (Global Bike Dallas), as *employee group* **1** (*Active*) and as *employee subgroup* **U4** (*Salaried employees*).

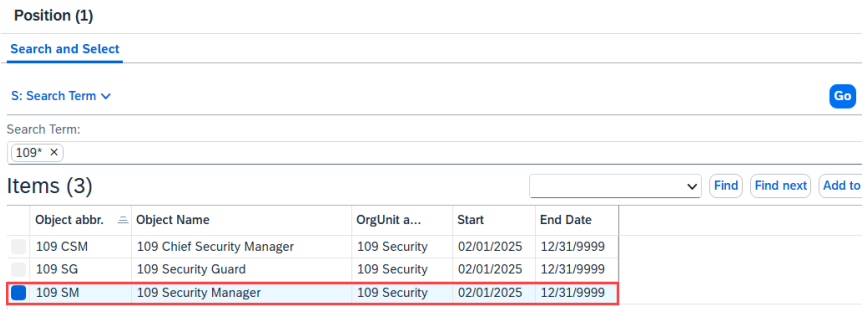

DL00
1
U4

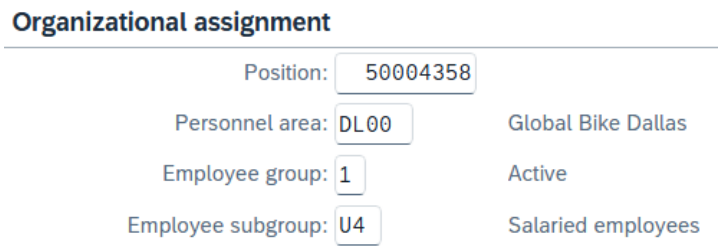

Then press to create the task, focus on the *Organizational assignment* area. Now click on the value help symbol in the *Position* field.

In the *Position (1)* window that opens, replace the search term with ***###**** and then select the ### **Security Manager**. Remember to enter your three-digit number for ###, e.g. if your number is 109, please enter 109.

###*
Securtiy Manager

Confirm the selection with OK.

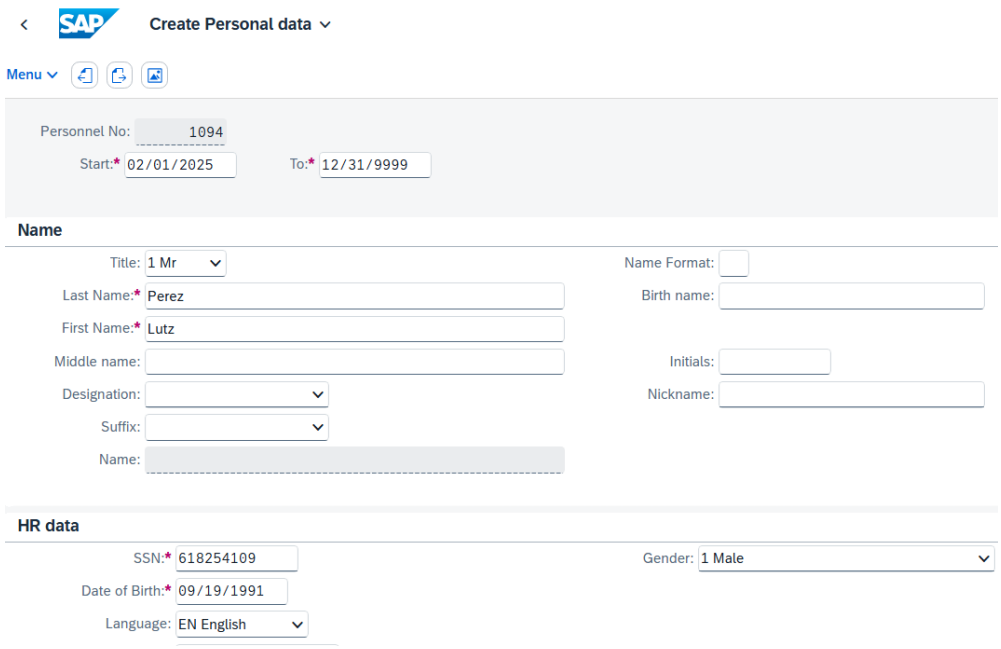

Press Save to save the action. You are automatically directed to the *Create Personal Data*. Make a note of the employee's personnel number, which you can find in the *Personnel number*. field at the top of the screen.

Personal number:

Note Personal information such as surname, first name and date of birth are defined in data fields. Data fields are grouped into information units according to their content. In Human Resources, these information units are referred to as information types or infotypes for short. Infotypes for employees are managed in Personnel Administration and are linked to the organizational plan via their position assignment**.**

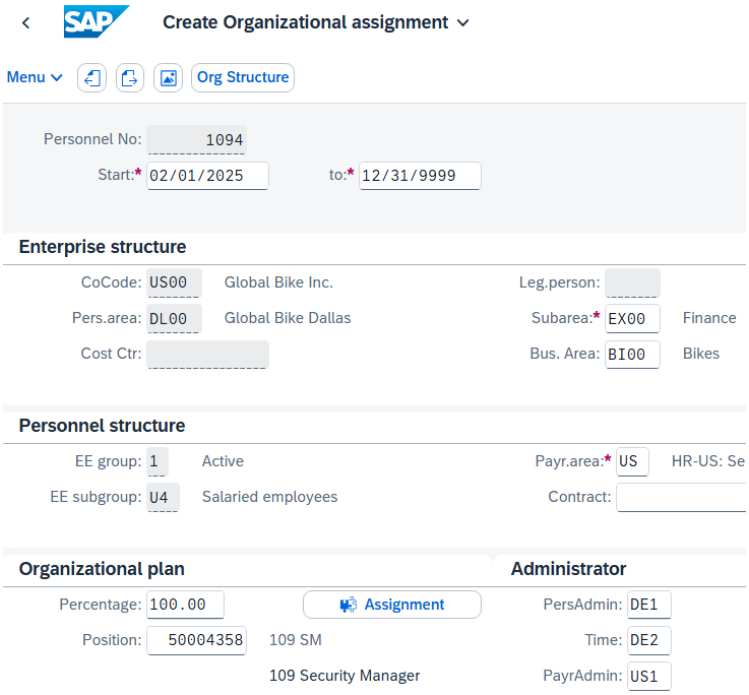

Title
Last Name
First Name
Date of Birth
SSN
gender

Specify the salutation and enter a **last** and **first name** as well as a **date of birth** of your choice. For the **social security number (SSN)** enter **483597###** and select **English** as the *language*. Finally, you can select the appropriate **gender** if you wish.

Press Save to confirm your data for this infotype. You are automatically forwarded to the next infotype *Create Organizational assignment*. In the *Enterprise structure* area, enter **EX00** as the personnel sub-area (*Subarea*.). In the *Administrator* area, use the input help to select Administrator **DE1** for *PerAdmin*, **DE2** for *Time* and **US1** for *PayrAdmin*.

EX00
DE1
DE2,US1

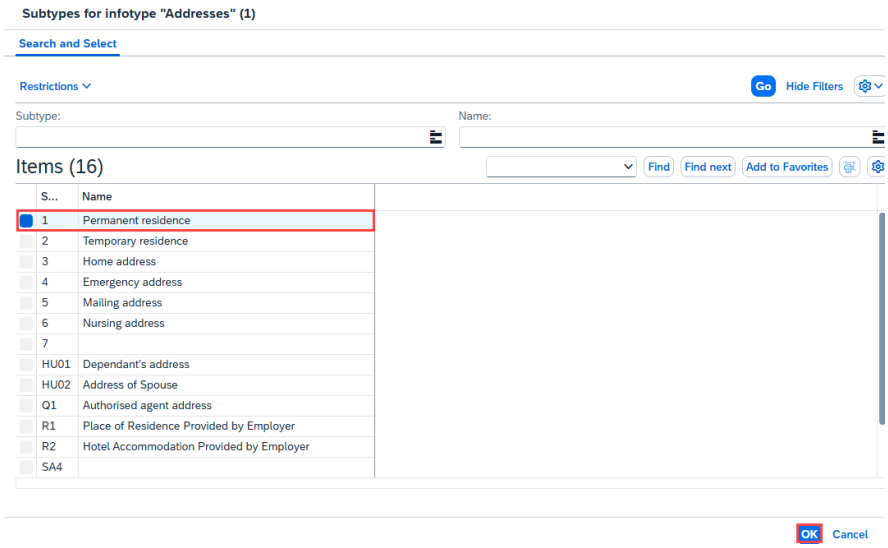

Select again Save. The *Delimit vacancy* pop-up opens. Confirm the delimitation of the vacancy for your position by clicking on Yes.

For the following *Create travel privileges* infotype, click on Save, as you do not need to make any changes here.

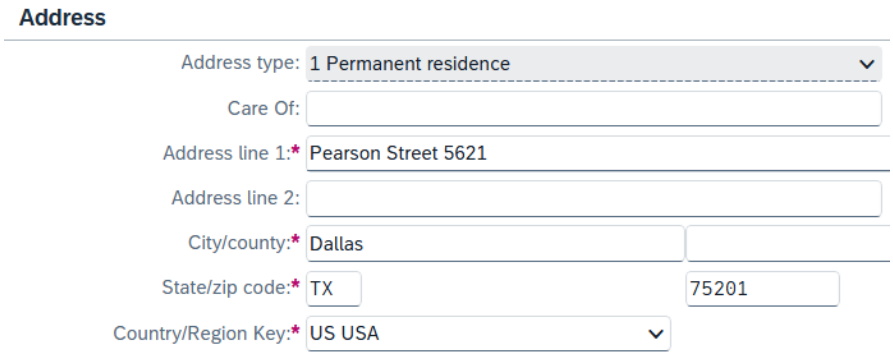

Permanent residence

In the *Subtypes for Addresses infotype* window that opens, select **Permanent residence** and continue with OK.

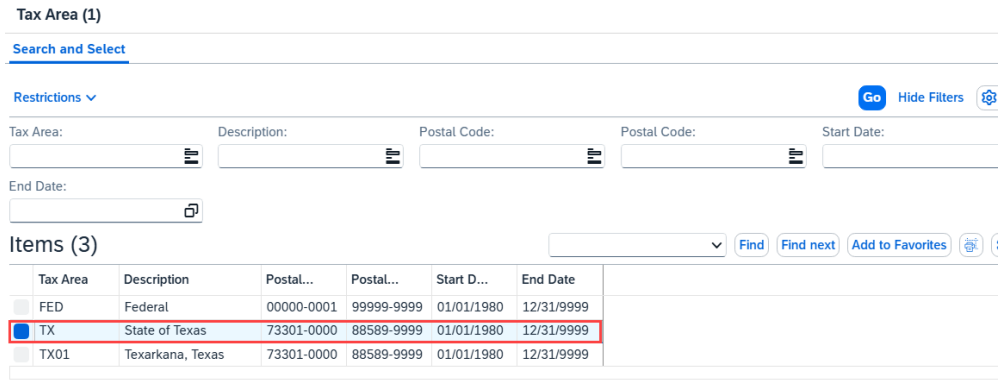

In the *Create Addresses* infotype, enter data of your choice for the **street** and **house number** in the *Address line 1* field. Enter **Dallas** as the *city*, **TX** (*Texas*) as *the state* and **75201** as the *zip code*. The country key is selected automatically.

Street
Dallas
TX
75201

Continue by pressing on Save. In the pop-up tax *territory*, select **TX** from the list. Then click on OK.

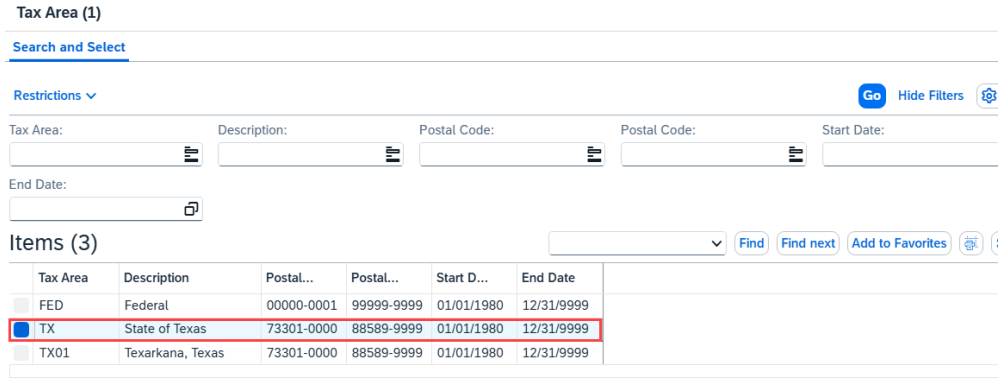

TX

Press Save for the *Create Residence Tax Area* infotype, as well as for the following two infotypes *Create Work Tax Area* and *Create Unemployment State*.

In the *Tax Area* pop-up that opens, select **TX** again. Accept the selection with OK.

TX

The *Create Residence Tax Area* infotype opens again, confirm all changes with Save. A warning message then appears that a data record will be deleted, confirm this with ✓. No data will be deleted, only overwritten.

Press Save to save the current infotype, again a message appears that a data record will be deleted, confirm with ✓.

Repeat the procedure until you reach the *Create Bank details* infotype. Accept the entries without making any changes by clicking Save. The data record is now complete and you return to the *Personnel actions* screen.

Click on SAP to return to the SAP Fiori Launchpad.

Step 4: Display Organizational Plan

Task Display the changes made in the organizational plan. **Time** 5 min.

Short Description Use the SAP Fiori Launchpad to display the changed organizational structure of the security department.

Name (Position) Sang Cha (Senior Personnel Administrator)

To display the changes, use the *Human Capital Management* area on the *Personnel Management* page in the *Senior Personnel Administrator role the app Display Organizational Plan.*

Start

Check whether your employees have been assigned to the position *### Chief Security* Manager or *### Security Manager*. If you do not see your organizational unit in the structure view, search for your organizational unit **### Security** in the search area and open it for viewing in the overview area. You can now see that your employee has been assigned to the ### Chief Security Manager position.

Security

Staff assignments (structure)	Code	ID	Chief
109 Security	109 Security	O 50000311	Mrs Lila Starling
109 Chief Security Manager	109 CSM	S 50004356	
Mrs Lila Starling	Starling	P 00001093	
109 Security Guard	109 SG	S 50004357	
109 Security Manager	109 SM	S 50004358	
Mr Lutz Perez	Perez	P 00001094	

Click on SAP to return to the SAP Fiori Launchpad.

Step 5: Departure of an Employee

Task The employee fills the position ### Chief Security Manager leaves the company. Carry out an exit action.

Time 10 min.

Short Description Use the SAP Fiori Launchpad to create an exit action.

Name (Position) Chris Thomas (Personnel Administrator)

To create a leaving action, use the *Human Capital Management area* on the *Personnel Management page* in the *Personnel Administrator role the app Hiring/transfer Employee*.

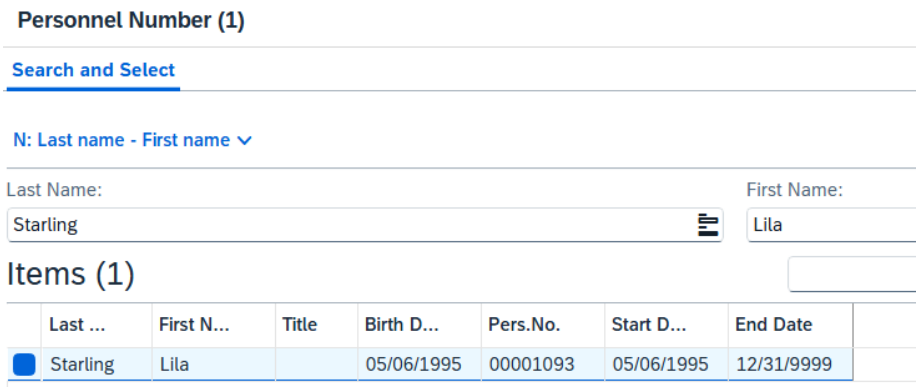

Start

Note The SAP system uses the day-based assignment in HCM for many processes. It plays an important role, for example, for cost center accounting, for tax and social security calculations to the exact day. You can also track the history of an employee in the "Org. assignment" infotype.

Enter the *personnel number* of the departing employee **(### Chief Security Manager**). If you no longer know this number, click in the corresponding field and use the value help symbol . Then search for the personnel number by name.

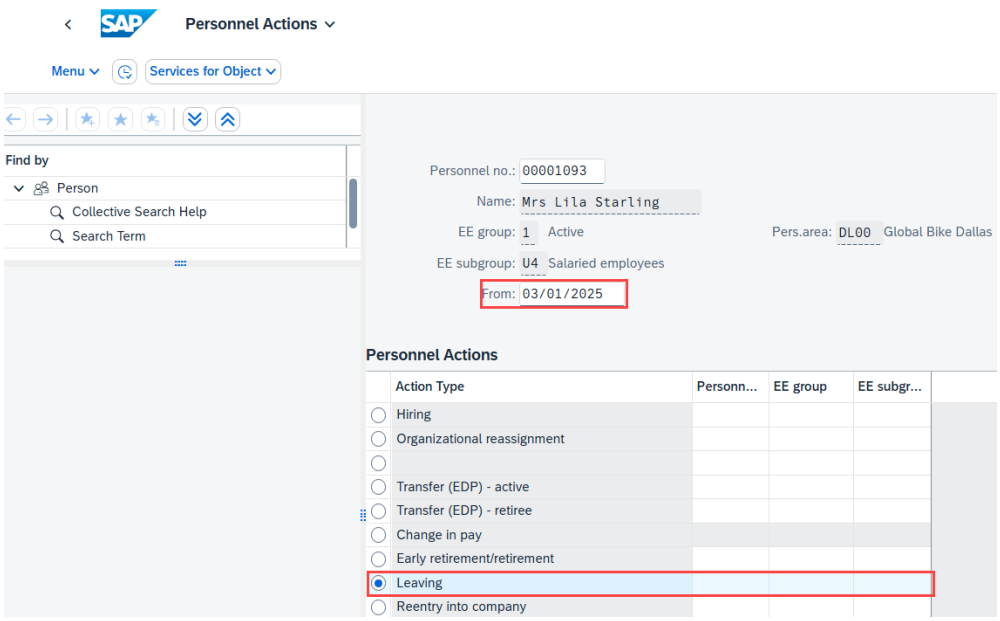

Personal number Chief Security Manager

Click on OK to accept the selection.

Now enter the date of the first day on which the employee left the company. It could be the **1st day of the following month.** Then select the **Leaving** action in the *Action type list.*

1st day of the following month.

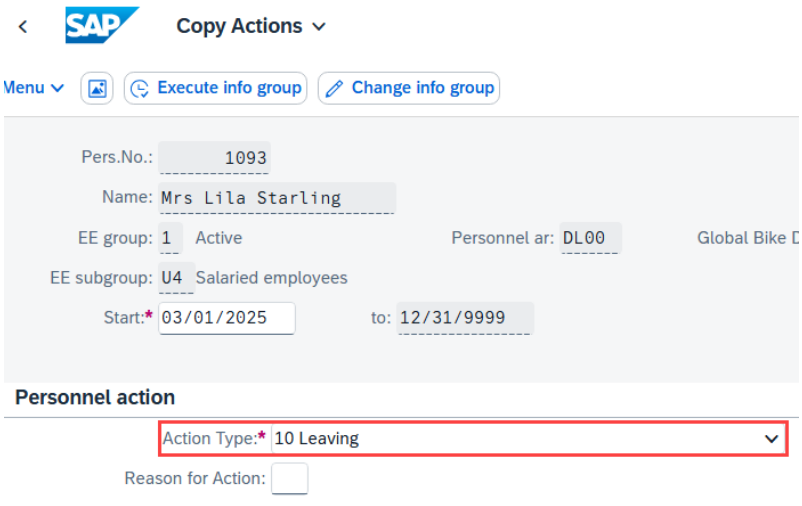

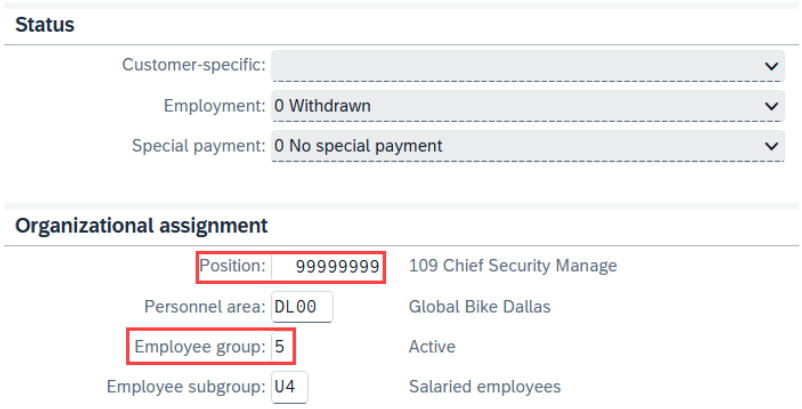

Press to create the resignation measure. You will now see that an action of the type "Leaving" has been created, which is valid from the following day.

Then change the *Position* to **99999999** in *the Organizational assignment* area. You must also make a change in the Employee group field, use the value help symbol to do this, then select **5 - terminated**. Then click on OK to accept the selection. Compare your entries with the following two screenshots.

Position 99999999

Employee group 5

Confirm your entries and other messages with Save.

A *Create vacancy* window then opens, confirm here too with Yes. In the further overview *organizational assignment* there are no changes, click on Save, as well as if further messages appear.

Click on SAP to return to the SAP Fiori Launchpad.

Step 6: Transfer of an Employee

Task An employee moves to another position, transfer the employee. **Time** 10 min.

Short Description Use the SAP Fiori Launchpad to change the employee's data in the system.

Name (Position) Chris Thomas (Personnel Administrator)

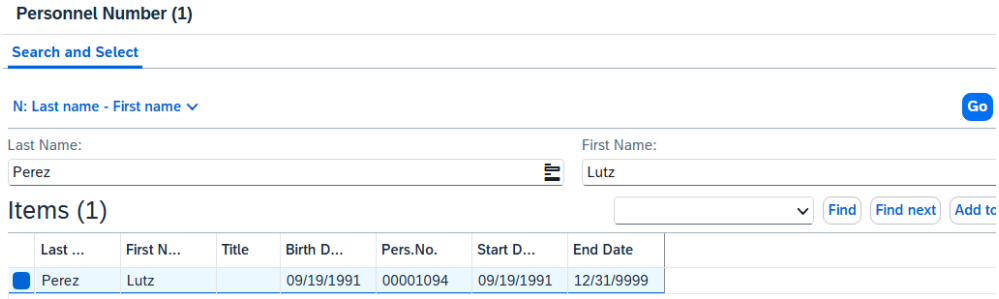

To change the employee data of an "*Organizational change*", use in the *Human Capital Management* on *the Personnel Management* page in the *Personnel Administrator* role, the app *Hiring/transfer Employee.*

Start

Enter the *personnel number* of the previously hired 2nd employee **(### Security Manager**). If you no longer know this number, click in the corresponding field and use the value help symbol . Then search for the personnel number by name.

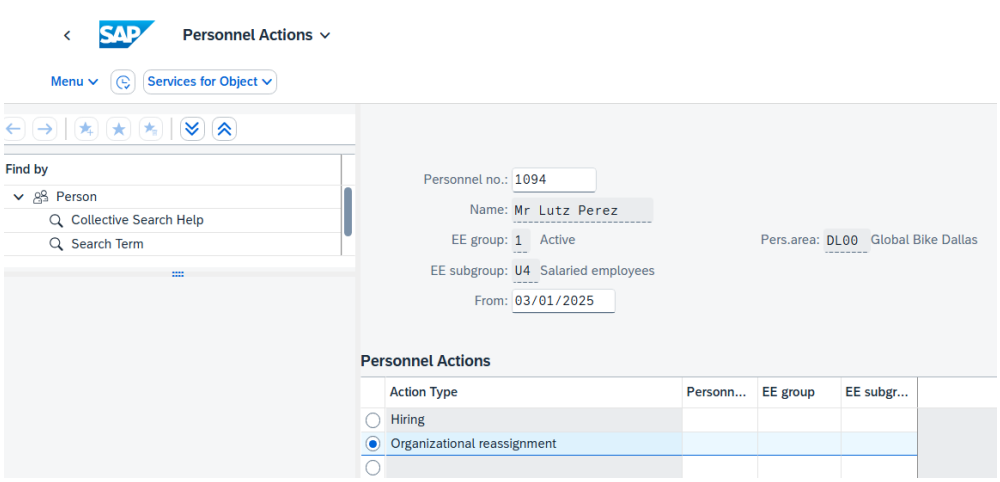

Personnel number

Click on OK to apply the selection.

Then select the Organizational reassignment in the *Action Type* list. In addition, enter the **start of the following month** in which the employee was hired.

Organizational reassignment
Start of the month following the month

USA

Note If the name is not displayed correctly in the overview but the personnel number is correct, there is no need to worry. The assignment is made using the correct personnel number.

In this scenario, the employee moves to a vacant position on 01.03.2025 and is promoted. Leave the fields in the *Personnel Actions* blank and execute the action. Press to create the organizational change.

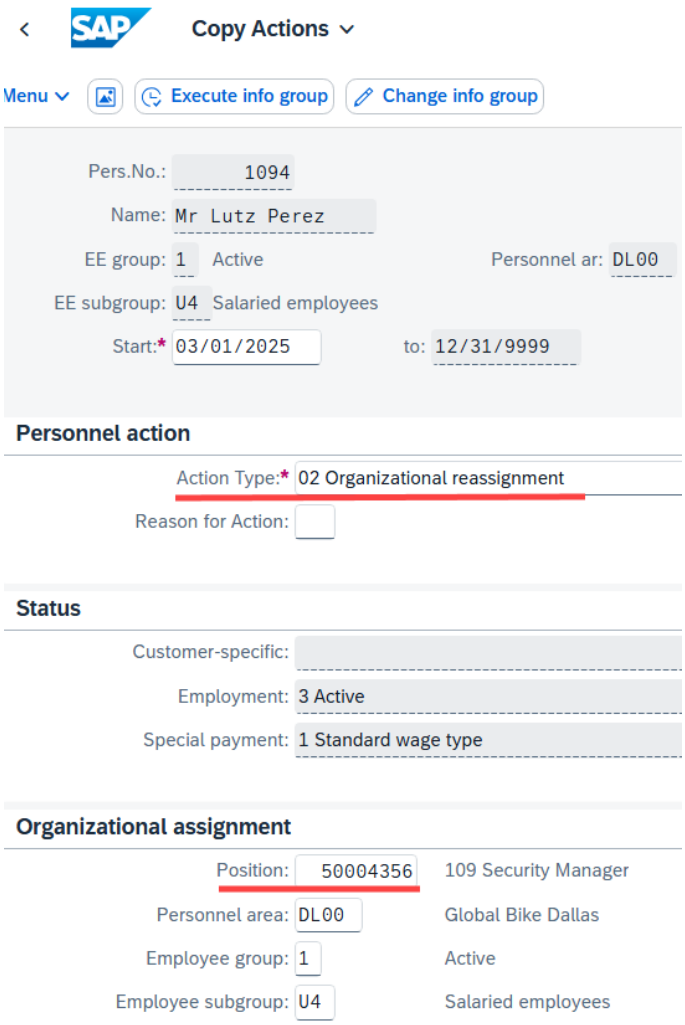

Security Guard

Focus on the *Organizational Assignment* area. Delete the value from the Position field and search using the value help icon. Enter ***###**** as the *search term* and select the ***### Chief Security Manager***. Remember to enter your three-digit number for ###, e.g. if your number is 109, please enter 109.

###*
###Chief Security Managers

Click on OK to accept the selection.

Check that the desired position has been transferred and save the data by clicking on Save, if a warning message appears, click on it again to confirm.

This takes you to the *Organizational assignment* overview, where you also confirm with Save, as well as if another warning message appears.

The *vacancy* windows then opens, confirm here too with Yes.

Click on SAP to return to the SAP Fiori Launchpad.

Step 7: Display Organizational Plan

Task Display the changes in the Display Organizational Plan. **Time** 5 min.

Short Description Use the SAP Fiori Launchpad to display the changed organizational structure of the security department.

Name (Position) Sang Cha (Senior Personnel Administrator)

To display the changes, use the *Human Capital Management* area on the *Personnel Management* page in the *Senior Personnel Administrator role, the app Display Organizational Plan.*

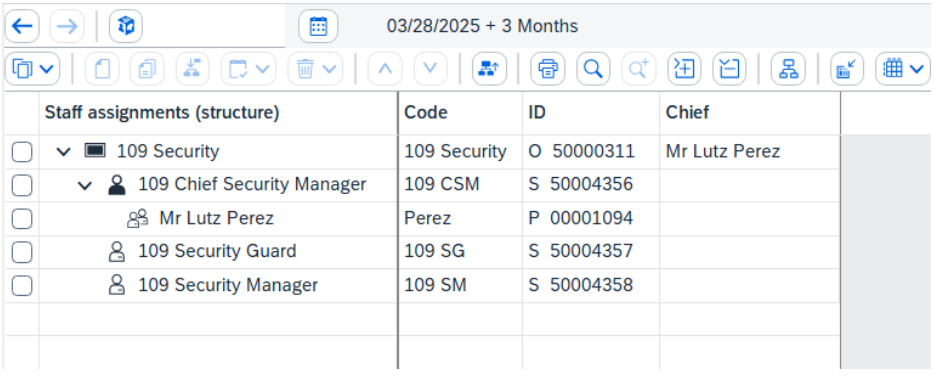

Start

Check whether your employee has been assigned to the ### **Chief Security Manager** position. If you do not see your organizational unit in the structure view, search for your *organizational unit* ### **Security** in the search area and open it for viewing in the overview area. You can now see that your employee has been assigned to the position ### **Chief Security Manager**.

Security

You can see that the 2nd employee you have hired is now in the position ### **Chief Security Manager**, instead of previously in the position ### **Security Manager.**

Click on SAP to return to the SAP Fiori Launchpad.
