Purchase-to-Pay Process (P2P) Standard Flow

Made with Visual Paradigm
For non-commercial use

Responsible: Requisitioner / Department

- Internal department identifies a need for materials/services.
- Create a **Purchase Requisition** (PR) in SAP.

Responsible: Purchasing Department

- Convert approved PR into a **Purchase Order (PO)**.
- Send PO to the selected vendor.

Responsible: Warehouse / Receiving Department

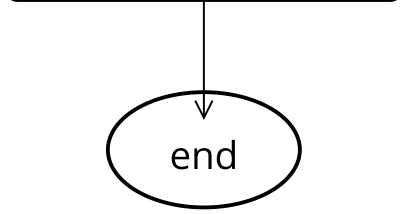

- When goods arrive, record a **Goods Receipt (GR)** in SAP.
- The system automatically updates **inventory** and posts the material into stock.

Responsible: Accounting / Accounts Payable

- Vendor sends an **invoice** referencing the PO and goods received.
- Record **Invoice Receipt** in SAP (three-way match: PO – GR – Invoice).

Responsible: Finance Department

- After verification, process **payment to the vendor** (e.g., bank transfer).

- System automatically updates **G/L accounts** (vendor, cash, ex
