PDF

EIS - T4 - Material Management.pdf
PDF

base on the connetnts we have covered thus far we should be able to do the 2nd case study the, the metirial managment case study

Absolutely — **yes, we can now do the full Materials Management (MM) Case Study**. You already uploaded the complete MM case study PDF **Intro_S4HANA_Using_Global_Bike_Case_Study_MM_en_v4.3.pdf**, and I have full access to all steps (Step 1–24). Intro_S4HANA_Using_Global_Bike_...
We also have the lecture slides **EIS – T4 – Material Management**, so everything needed is here. EIS - T4 - Material Management

---

✅ What we can do next

We can start **step-by-step**, exactly like we did with SD Case Study 1, and I will guide you through each action in your SAP system:

MM Case Study steps include:

1. Create Vendor
2. Create Material
3. Extend Material
4. Check Stock
5. Create Purchase Requisition
6. Check Requirements
7. Create RFQ
8. Maintain quotations for 3 suppliers
9. Price-based bid evaluation
10. Create Purchase Order
11. Display PO

12. Goods Receipt (partial)
13. Quality Check
14. Physical Stock Check
15. Supplier Invoice 1

    16–20 Follow-up steps (GR2, Invoice2)
16. Outgoing payment

    22–24 Review supplier balance + FI postings

You tell me **which step you want to start**, and I'll walk you through it.

✅ Before we begin

Tell me:

Which step of the MM case study do you want to start with now?

- Step 1: Create Vendor?
- Step 2: Create Material?
- Or are you already somewhere inside and stuck?

Just send me **"Step X"** and a screenshot if needed — I'll guide you through it.

i want you to start from the start of th ewhole meterial managment case study, give me step by step instructions, first give me the whole instuctions for the whole case study step by step based on the info provided on the MM case study pdf. Later i will tell you to restart, we will do together the case study step by step but only when i tell u am done with the step we are on we will move to the next one

Perfect, that's exactly how we'll do it:
1️⃣ Now: I give you the **full step-by-step instructions for ALL 24 steps** of the MM case study.
2️⃣ Later: you'll say "let's restart at Step 1" and we'll go **one step at a time**, only moving on when *you* say you're done.

Before we start: notation

In the PDF, they use `###` for **your 3-digit learner number** (for example, `105`).

So:

- **Vendor name**: `Mid-West Supply ###`
- **Material**: `CHLK1###`
- **User**: `LEARN-###`

I'll keep that format so it matches the case study exactly.

Full MM Case Study – Step-by-Step Instructions

Step 1 – Create Vendor (Mid-West Supply ###)

Role / App: Contract Manager → *Manage Business Partner Master Data*

1. Go to **Materials Management** space → open **Manage Business Partner Master Data**.
2. Click **Create** → choose **Organization**.
3. In the popup:
   - Leave **Business Partner** blank (system will assign number).
   - **BP Role**: choose **FI Vendor (FLVN00)**.
4. In **Organization Title**: select **Company (0003)**.
   - **Name 1**: `Mid-West Supply ###`.
5. In **Basic Data → Search Term 1**: enter your `###`.
6. In **Address**:
   - Street: `335 W Industrial Lake Dr`
   - Postal Code: `68528`
   - City: `Lincoln`
   - Country: `US`, Region: `NE`
   - Language: `EN – English`
7. Go to **Identification → Tax Numbers**:
   - Add row:
     - **Tax Category**: `US1`
     - **Tax Number**: `12-3456###`
8. Go back to **Roles** → click **+** → add role **Vendor (FLVN01)** → click the pencil icon to edit it.
9. In **Company Codes**:

- Add company code: `US00`
- In **Finance** tab:
  - **Reconciliation Account**: `3300000` (Trade payables)
  - **Payment Terms**: `0001` (Payable immediately, due net)
  - Tick **Check Duplicate Invoice**.

10. In **Correspondence**:
    - **Clerk at supplier**: `LEARN-###`.
11. In **Purchasing Organizations**:
    - Add Purchasing Org: `US00`
    - **Order Currency**: `USD`
    - **Payment Terms**: `0001 – Payable immediately Due net`.
12. In **Partner Functions**:
    - Add **Partner Function**: `VN` (Vendor).
13. Save the Business Partner (your vendor number is created) and go back to Fiori Launchpad.

Step 2 – Create Material (Chain Lock ###)

Role / App: Warehouse Supervisor → *Manage Product Master Data*

1. Open **Manage Product Master Data** → click **Create**.
2. In the popup:
   - **Product Number**: `CHLK1###`
   - **Product Type**: `HAWA` (Trading Goods)
   - **Base Unit of Measure**: `EA`
   - **Product Group**: `UTIL` (Utilities)
   - **Description**: `Chain Lock ###`
3. On **General Information** tab:
   - **Division**: `AS – Accessories`
4. Under **Descriptions**:
   - Add new description:
     - Language: `DE`
     - Text: `Kettenschloss ###`
5. Under **Units of Measure**:
   - Edit the line for `EA` → **Dimensions** tab:
     - **Gross Weight**: `65`

- **Unit**: `OZ`

6. Go to **Sales → Distribution Chains** and click **+**:
   - **Sales Org**: `UE00` (US East)
   - **Distribution Channel**: `WH` (Wholesale)
   - **Delivery Plant**: `MI00` (DC Miami)
   - **Item Category Group**: `NORM` (Standard item)
   - **Sales Tax → Tax Classification**: `0 – Exempt` for all three tax categories.
7. Go to **Plants** and click **+**:
   - **Plant**: `MI00`
   - **Loading Group**: `Hand lift`
8. Go to **Purchasing**:
   - **Purchasing Group**: `N00` (North America).
9. Go to **MRP Data**:
   - **MRP Type**: `PD`
   - **MRP Controller**: `000` (MI MRP Controller)
   - **Availability Check**: `02 – Individual Requirements`
10. **Lot-Size Data**:
    - **Lot-Sizing Procedure**: `EX – Lot-for-lot`
    - **Minimum Lot Size**: `10`
11. **Procurement**:
    - **Planned Delivery Time**: `6` (days).
12. **Storage Locations** tab:
    - Add **Storage Location**: `TG00` (Trading Goods).
13. **Valuation Areas**:
    - Add Valuation Area: `MI00`
    - **Valuation Class**: `3100` (Trading goods).
14. **Valuation**:
    - **Inventory Price**: `32.00 USD`
    - **Price Control**: `V – Moving Average Price`.
15. Save material and return to Launchpad.

Step 3 – Change Material (Extend to US West / SD00)

Role / App: Warehouse Employee → *Manage Product Master Data*

1. Open **Manage Product Master Data**.

2. Search **Product**: `CHLK1###` → Open it → click **Change**.
3. Go to **Distribution Chains** → click **+**:
   - **Sales Org**: `UW00` (US West)
   - **Distribution Channel**: `WH` (Wholesale)
   - **Delivery Plant**: `SD00` (San Diego)
   - **Item Category Group**: `0001 – Make-to-order`
   - **Tax Classification**: `0 – Exempt` for all three.
4. Save and return to Launchpad.

Step 4 – Display Stock (currently zero)

Role / App: Inventory Supervisor → *Stock – Single Material*

1. Open **Stock – Single Material**.
2. In **Material**, open value help and search with `*###`, then pick `CHLK1###`.
3. View stock list and **Stock History** for plant `MI00`:
   - All key figures should be **0** (no stock yet).

Step 5 – Create Purchase Requisition (200 pcs)

Role / App: Inventory Supervisor → *My Purchase Requisition – New*

1. Open **My Purchase Requisition – New** → click **Create**.
2. **Material**: `CHLK1###` → press Enter (description, group and price fill automatically).
3. **Quantity Requested**: `200` (shows as `200.000`).
4. **Delivery Date**: "today + 3 months".
5. Under **Notes → Item text**, enter:

   > Global Bike formally requests quotations for the following material.
   > Quotations will be accepted until [01.day of next month].

6. Save the purchase requisition and close.

Step 6 – Manage Stock / Requirements List

Role / App: Inventory Assistant → *Stock – Single Material*

1. Open **Stock – Single Material** again.

2. **Material**: `CHLK1###`.
3. Look at the **stock/requirements list**:
    - You'll see the *requirement* from the purchase requisition, but **physical stock is still 0**.

Step 7 – Create RFQ (RFQ1###, 3 bidders)

Role / App: Purchasing Agent → *Process Purchase Requisitions*

1. Open **Process Purchase Requisitions**.
2. In **Search**, enter `CHLK1###` → Execute.
3. Select the row for your PR → click **Assign and Create → Request for Quotation**.
4. In popup:
    - **RFQ Type**: `Request for Quote`
    - **RFQ Description**: `RFQ1###`
    - **Quotation Deadline**: one month from today
    - **Purchasing Organization**: `US00`
    - **Company Code**: `US00`
5. In **Bidders**:
    - Add `Mid-West Supply ###` (your new vendor – pick from list).
    - Add `Dallas Bike Basics`.
    - Add `Spy Gear`.
6. Confirm and save RFQ. Close and return to Launchpad.

Step 8 – Create Supplier Quotations (prices from 3 vendors)

Role / App: Inventory Assistant → *Manage RFQs*

1. Open **Manage RFQs**.
2. Search **RFQ**: `RFQ1###` → open it.
3. In **Bidders**:
    - Select bidder **Mid-West Supply ###** → click **Create Quotation**.
4. In the quotation:
    - **Quotation Submission Date**: three weeks from today
    - **Follow-on Document Type**: `NB`
    - In **Items**: set **Net Order Price** = `32.00 USD`.
    - Save, then **Submit** quotation.

5. Return to RFQ, repeat for other two bidders:
   - **Dallas Bike Basics** → price `36.50 USD`
   - **Spy Gear** → price `35.00 USD`
6. Ensure all 3 quotations are saved and submitted.

Step 9 – Price-Based Bid Evaluation (choose cheapest)

Role / App: Inventory Supervisor → *Compare Supplier Quotations*

1. Open **Compare Supplier Quotations**.
2. Use F4 help to find your **RFQ** by description `RFQ1###`.
3. Open it: you see 3 quotations sorted and the total net values.
4. Identify the **best quote (lowest price)** → that is **Mid-West Supply ###** (32.00).
5. Mark it as **Best Quotation** (button in app).
6. For the other two quotes (Dallas Bike Basics, Spy Gear):
   - Open each quotation → **Complete / Reject** it.
7. Save and return.

Step 10 – Create Purchase Order from RFQ (split into 2x100)

Role / App: Inventory Assistant → *Manage RFQs*

1. Open **Manage RFQs**.
2. Search `RFQ1###*` → open your RFQ.
3. Go to **Process Flow**:
   - You'll see PR → RFQ → 3 quotations (2 rejected, 1 open).
4. Click the **accepted quotation** (Mid-West Supply ###) → **Quotation number**.
5. In the quotation, choose **Create Follow-On → Purchase Order**.
6. In the **Purchase Order**:
   - Go to **Items**: you see one line with `CHLK1###`, qty `200`.
7. Split delivery:
   - Change **Order Quantity** from `200` → `100`.
   - Select the item → click **Copy / Duplicate Item** to create the second line with 100 (or the system may suggest split via schedule lines depending on config; in the PDF they use schedule lines).
   - In **Schedule Lines** for the first line: set **Delivery Date** = *today*.

- For the second line: usually keep the original (or another date if specified later).

8. Save the purchase order. Note your **PO number**.

Step 11 – Display Purchase Order

Role / App: Purchasing Agent 2 → *My Purchasing Document Items (Professional)*

1. Open **My Purchasing Document Items (Professional)**.
2. In **Supplier**: enter `Mid-West Supply ###` → Execute.
3. Go to the **Purchase Orders** tab (or similar).
4. Locate your PO and review items, quantities, prices and delivery dates.
5. Return to Launchpad.

Step 12 – Post Goods Receipt for Purchase Order (first 100 to Quality Inspection)

Role / App: Goods Receipt Clerk → *Post Goods Receipt for Purchasing Document*

1. Open **Post Goods Receipt for Purchasing Document**.
2. In **Purchasing Document**:
   - Either enter PO number directly, or use F4 help and search by `CHLK1###`.
3. Select your PO → you see **two lines of 100** (split order).
4. Settings:
   - **Printing**: `Individual slip`
   - In item line: **Storage Location** = `TG00 – Trading Goods`
5. We process only **first delivery**:
   - Click the first line (100 pcs).
   - Tick **Delivery Completed**.
   - **Stock Type**: change to **Quality Inspection**.
6. Post the goods receipt:
   - Click **Check / Post** (depending on layout) → you get a **Material Document** number.
7. Return to Launchpad.

Step 13 – Check Received Goods (Quality Inspection → Unrestricted)

Role / App: Warehouse Supervisor → *Stock – Single Material*

1. Open **Stock – Single Material**.
2. **Material**: `CHLK1###`.
3. You see **100 units in Quality Inspection** stock.
4. Click the **Stock History icon** in the **Trading Goods / MI00** row.
5. To release goods:
   - Select row for **MI00 / TG00** → click **Transfer Posting**.
   - In column **Stock in Quality Inspection** click the link next to `100`.
   - Then click the icon under **Unrestricted-Use Stock**.
   - In **Transfer Stock – In-Plant** window, quantity: `100`.
6. Post transfer → success message → return to Launchpad.

Step 14 – Check Physical Goods Receipt (stock now 100 unrestricted)

Role / App: Goods Receipt Clerk → *Manage Stock*

1. Open **Manage Stock**.
2. **Plant**: `MI00 – DC Miami`.
3. In **Material** field → value help → search `*###` → pick `CHLK1###`.
4. You see plant stock:
   - **Unrestricted Use** = `100` (after transfer).
5. Click **More / Details** to see graphical overview per plant and storage location.

Step 15 – Create & Post First Supplier Invoice (3,200 USD)

Role / App: AP Accountant → *Create Supplier Invoice*

1. Open **Create Supplier Invoice**.
2. Header data:
   - **Invoice Date**: today
   - **Company Code**: `US00`
   - **Gross Invoice Amount**: `3,200.00`
   - **Reference**: `INVOICE00504-###`
3. Go to **Purchasing Document References** tab.
4. In **Purchase Order / Scheduling Agreement**:
   - Enter your **PO number** → press Enter.
   - **Invoicing Party** will fill with vendor number of **Mid-West Supply ###**.

5. For **first item**:
   - **Tax Code**: `XI`
   - **Tax Jurisdiction**: `TX0000000`
6. Check header:
   - **Balance** should be `0.00 USD`.
7. Click **Simulate / Check** → then **Post**.
8. System generates **supplier invoice number**. Return to Launchpad.

Step 16 – Display Purchase Order History (first delivery & invoice)

Role / App: Inventory Supervisor → *My Purchasing Document Items (Professional)*

1. Open **My Purchasing Document Items (Professional)**.
2. **Supplier**: `Mid-West Supply ###` → Execute.
3. Go to the **Purchase Orders** tab and select your PO.
4. In **View Settings** for **Purchase Order Items**:
   - Add columns **Delivered Quantity** and **Delivered Amount**.
   - You should see **100 delivered**, value `3,200.00 USD`.
5. Go to **Goods Receipts** tab:
   - See the material document for the 100 chain locks.
6. Go to **Supplier Invoices** tab:
   - Click **Refresh** → your invoice appears as **Posted**.
   - Click the invoice line to jump to the FI document if you want.

Step 17 – Display Document Flow (material documents)

Role / App: Inventory Supervisor → *Material Documents Overview*

1. Open **Material Documents Overview**.
2. If search panel is collapsed, click **Expand Header**.
3. **Material**: `CHLK1###` → Execute.
4. In **Settings**, make sure the column **Stock Type (Stock Transfer)** is active.
5. You should see **two material documents**:
   - Goods receipt into **Quality Inspection**.
   - Transfer posting to **Unrestricted-Use Stock (01)**.
6. Select the line with **Stock Type (Transfer) = Unrestricted-Use Stock (01)**.
7. Open it and go to **Process Flow**:

- You see the movement from **Quality Inspection** → **Unrestricted Use**.

8. Return to Launchpad.

Step 18 – Post Goods Receipt for Purchase Order (second 100, directly unrestricted)

Role / App: Goods Receipt Clerk → *Post Goods Receipt for Purchasing Document*

1. Open **Post Goods Receipt for Purchasing Document**.
2. In **Purchasing Document** use F4 help:
   - Search by `*###` and `CHLK1###`.
   - You now see only **one open PO** for your material (the remaining 100).
3. Double-click the PO → Items tab shows **one row (100)**.
4. Ensure:
   - **Storage Location**: `TG00 – Trading Goods`
   - **Stock Type**: `Unrestricted Use` (we inspect directly at GR).
5. Select the item line → tick **Delivery Completed**.
6. Click **Check / Post** → system creates material document.
7. Return to Launchpad.

Step 19 – Check Physical Goods Receipt (stock now 200 unrestricted)

Role / App: Goods Receipt Clerk → *Manage Stock*

1. Open **Manage Stock**.
2. **Plant**: `MI00 – DC Miami`.
3. Use value help on **Material** → search `*###` → choose `CHLK1###`.
4. Now **Unrestricted Use** stock = `200` (100+100).
5. You can open **details** and **Stock History** for MI00 to see the graphical development.

Step 20 – Create & Post Second Supplier Invoice (3,200 USD)

Role / App: AP Accountant → *Create Supplier Invoice*

1. Open **Create Supplier Invoice**.
2. Header:
   - **Invoice Date**: today

- **Company Code**: `US00`
- **Gross Amount**: `3,200.00`
- **Reference**: `INVOICE00515-###`

3. Go to **Purchasing Document References**:
   - Enter your **PO number** → Enter (vendor fills automatically).
4. For the second invoice item:
   - **Tax Code**: `XI`
   - **Tax Jurisdiction**: `TX0000000`
5. Make sure **Balance = 0.00**.
6. **Simulate / Check** → **Post**.
7. Return to Launchpad.

Step 21 – Post Outgoing Payment (pay total 6,400 USD)

Role / App: AP Accountant → *Post Outgoing Payments*

1. Open **Post Outgoing Payments**.
2. Header:
   - **Company Code**: `US00`
   - **Posting Date**: today
   - **Journal Entry Date**: today
   - **Reference**: `INVOICES ###`
   - **Period**: current period
   - **G/L Account**: `1810000` (Bank 1)
   - **Amount**: `6,400.00 USD` (2 × 3,200)
   - **Journal Entry Type**: `KZ – Vendor Payment`
3. Under **Open Item Selection**:
   - **Account**: your vendor Mid-West Supply (use F4 help if needed).
4. Click **Open Items**:
   - You see the two invoices (each 3,200).
5. Select both items by clicking the **select / clear** icon in each line.
   - The **Open Balance** becomes `0.00`.
6. Post the payment. A **payment document number** is created.
7. Return to Launchpad.

Step 22 – Display Supplier Balance (Mid-West Supply ###)

Role / App: Head of Accounting → *Display Supplier Balances*

1. Open **Display Supplier Balances**.
2. In **Supplier** field:
   - Use value help, search by **Search Term** `###*` to find `Mid-West Supply ###`.
3. Back on main screen:
   - **Company Code**: `US00`
   - **Fiscal Year**: current year.
4. Execute:
   - You should see **one debit** (payment) and **two credit** postings (invoices), with **balance cleared** (0).

Step 23 – Display Purchase Order History (everything completed)

Role / App: Inventory Supervisor → *My Purchasing Document Items (Professional)*

1. Open **My Purchasing Document Items (Professional)**.
2. **Supplier**: `Mid-West Supply ###` → Execute.
3. Select your PO.
4. In **View Settings**, add **Next Delivery Quantity** column:
   - It should now show **no open quantities** (all received).
5. In the **Goods Receipts** tab:
   - Click **Show Completed Items** → you see both GRs (100 + 100).
6. In **Supplier Invoice Overview**:
   - See both invoices, **status: Posted**.
   - You can click on each line to jump to the FI document.

Step 24 – Display Account Balances (FI view)

Role / App: Head of Accounting → *Balance Sheet / Income Statement*

1. Open **Balance Sheet/Income Statement** app.
2. In **Display Financial Statement**:
   - **Company Code**: `US00`
   - **Ledger**: `0L`
   - **Financial Statement Version**: `G000`
   - **Balance Sheet Type**: `Normal (Actual – Actual)`
   - **End Period**: current period/year

- **Comparison Period**: `1/2016`

3. Execute:
   - You can see balances of accounts (e.g. bank account `1810000`, trade payables `3300000`, GR/IR etc.) including the effects of your whole process.
4. Return to Launchpad – MM case study is complete. 🎉

When you're ready to actually **do it together in the system**, just tell me:

> "Let's restart with Step 1"

and then you can say e.g. "done with Step 1" and I'll guide you **live** to Step 2, Step 3, etc.
