Introduction to Artificial Intelligence
Prof. Dr. Hamed Shariat Yazdi, Darmstadt University of Applied Sciences

Assignment:
Complex Event Processing

In this lab session, you will practice working with sliding ("rolling") windows. You will be working in your teams of two students each.

1. Read Chapter 8 of the book "Applied Artificial Intelligence – An Engineering Approach".
2. Answer the quick check questions
3. Download Covid-19_SG.csv from the Moodle course
4. In your Pycharm project, create a new Python package "09_CEP"
5. Create a new subfolder data and store Covid-19_SG.csv
6. Create a new Jupyter notebook Covid19.ipynb
7. Implement:
    a. Load and prepare data
    b. Implement 7-day-incidence
    c. Visualize 7-day-incidence
    d. Implement hospitalization rate
    e. Visualize hospitalization rate
    f. Implement criticality
    g. Visualize criticality
    h. Implement and visualize other interesting measures of your choice
8. Optional: Detect pandemic "waves"
9. Commit your code to the Git repository
